Nomogram—Predicted Probability of 1-Year OS

Actual 1-Year OS (proportion)
n=130 d=24 p=3, 20 subjects per group
Gray: ideal
Black: observed–predicted
X − resampling optimism added, B=100
Based on observed–predicted

Nomogram—Predicted Probability of 3-Year OS

Actual 3-Year OS (proportion)
n=130 d=24 p=3, 20 subjects per group
Gray: ideal
Black: observed–predicted
X − resampling optimism added, B=100
Based on observed–predicted

Nomogram—Predicted Probability of 5-Year OS

Actual 5-Year OS (proportion)
n=130 d=24 p=3, 20 subjects per group
Gray: ideal
Black: observed–predicted
X − resampling optimism added, B=100
Based on observed–predicted
