**Supplementary Table 1. Zero-order correlation matrix**

| Variables                        | STAIS   | STAIT   | CBCL anxiety |
|----------------------------------|---------|---------|--------------|
| Withdrawn/depressed              | 0.40*†  | 0.21*   | 0.62†        |
| Somatic complaints               | 0.24*   | 0.20    | 0.46†        |
| Rule-breaking behavior           | 0.09    | -0.02   | 0.30†        |
| Aggressive behavior              | 0.22*   | 0.13    | 0.48†        |
| SRS-2 mannerism                  | 0.34†   | 0.31†   | 0.51†        |
| RRBs total scores from the ADI-R | 0.08    | 0.08    | 0.04         |
| ADI-R 1                          | -0.08   | -0.13   | -0.12        |
| ADI-R 2                          | 0.37†   | 0.25*   | 0.15         |
| ADI-R 3                          | -0.03   | 0.10    | -0.07        |
| ADI-R 4                          | 0.01    | -0.01   | 0.16         |
| Sensory sensitivity              | 0.28†   | 0.21*   | 0.38†        |

N=96 for all correlations. *p<0.05, †p<0.01. ADI-R 1: Encompassing preoccupation or circumscribed pattern of interest, ADI-R 2: Compulsive adherence to routines or rituals, ADI-R 3: Motor mannerisms, ADI-R 4: Preoccupation with parts of objects or non-functional elements of material, STAIT: State-Trait Anxiety Inventory-Trait, STAIS: State-Trait Anxiety Inventory-State, CBCL: Child Behavior Checklist.
