# Contents

Abbreviations and symbols

### Chapter 1

#### Theoretical background

1. Introduction
2. Prosodic Phonology: basic claims
3. The organization of grammar
   - 3.1. The lexical/postlexical distinction and the properties of phonological processes
   - 3.2. The locus of construction of prosodic domains
4. The status of the Clitic Group within the prosodic hierarchy
5. The Strict Layer Hypothesis
6. The prosodization of words
   - 6.1. Diagnostics for the prosodic word
   - 6.2. The prosodic word domain
   - 6.3. The prosodization of clitics
   - 6.4. The prosodization of compounds
   - 6.5. The prosodization of derived words
7. Syllabification, resyllabification, and prosodic restructuring
8. Concluding remarks and outline of the book

### Chapter 2

#### Previous studies on European Portuguese word phonology

1. Introduction
2. Pregenerative studies
3. SPE studies
4. Post-SPE studies
   - 4.1. Words with two primary stresses
   - 4.2. Cliticization
   - 4.3. Phonological processes and the organization of grammar
5. Concluding remarks
Chapter 3
Phonological phenomena: description and typology

1. Introduction 63
2. Word stress 64
3. Vowel reduction 67
4. Theme vowel deletion 73
5. Final nasal diphthongization 74
6. /e/-centralization 78
7. Glide insertion to break a hiatus 83
8. Lowering of stressless vowels in final syllables closed by /r/ 85
9. Initial /r/-strengthening 89
10. The realization of word initial vowels 92
11. Semivocalization 99
   11.1. V2 semivocalization (>VG) 100
   11.2. V1 semivocalization (>GV) 102
12. Final non-back vowel deletion 104
13. Final round vowel deletion 108
14. Final central vowel deletion 112
15. Syllable degemination 114
16. Initial stress 118
17. Emphatic stress 120
18. Tonal association 121
19. Focal stress 123
20. Summary 124

Chapter 4
On the affix/clitic status of stressless pronouns 127

1. Introduction 127
2. Potential evidence for the lexical attachment of pronominal clitics 128
   2.1. Specialized host 129
   2.2. Phonological idiosyncrasy 129
   2.3. "Inflection" after cliticization 130
3. Evidence for the postlexical insertion of pronominal clitics 131
   3.1. Distributional facts 131
   3.2. Phonological facts 134
   3.3. Other facts 137
Chapter 5

The Prosodic Word

1. Introduction
2. Phonological properties of prosodic words
3. Derived and inflected words
   corresponding to a single stress domain
   3.1. Prosodization of suffixes
   3.2. Prosodization of prefixes
4. Host plus clitic combinations
   4.1. Phonological characterization of clitic words
   4.1.1. On the definition of clitics
   4.1.2. Identification and classification of EP clitic words
   4.2. Lexical prosodization of clitics
   4.3. Postlexical prosodization of clitics
   4.3.1. Prosodization of enclitics
   4.3.2. Prosodization of proclitics
5. Affixes versus clitics
   5.1. Suffixes and enclitics
   5.2. Prefixes and proclitics
6. Conclusion: towards the definition
   of the prosodic word domain in EP

Chapter 6

Compound Prosodic Words

1. Introduction
2. Phonological characterization of prosodic words
   and their concatenation
3. Prosodization of words with more than one stress domain
   3.1. Suffixed words with more than one word stress
3.2. Words with stressed prefixes 228
3.3. Morphological compounds (stem compounds) 233
3.4. Syntactic compounds (word compounds) 236
3.5. Abbreviations 241
3.6. Mesoclitic structures 243
3.7. Specific combinations of words 247
3.8. Interim summary 250
4. Additional evidence for the prosodic word domain 250
5. Discussion 255
  5.1. On the sources of word stress 255
  5.2. On the relation between word stress and the prosodic word 260
  5.3. Definition of the prosodic word domain in EP: final remarks 262

Chapter 7
On the reduction of clitics 273

1. Introduction 273
2. EP vowel reduction and other reduction phenomena 278
3. Data collection: materials and procedure 281
4. Results 283
  4.1. Consonant-schwa clitics 283
  4.2. Other clitics: para, pelo/pela, ao and em 291
  4.3. The clitic com 295
  4.4. Summary 297
5. Discussion 298
  5.1. The phonetic shape of clitics and EP general processes of reduction 298
  5.2. Reduction phenomena and word frequency 303
  5.3. Generalizations on the reduction of very frequent words 307
  5.4. Factors (dis)favoring reduction 309
    5.4.1. The importance of intonational phrase initial position 309
    5.4.2. The importance of grammatical category 314
  5.5. Reduction versus allomorphy 319
6. Summary of main findings 323

Chapter 8
Conclusion and directions of future research 325

1. Introduction 325
2. Minimal prosodic words 325
