Table 5. Median and IQR of genetic counselor distance-based access to care (state-level median of distances to the nearest genetic counselor, weighted by cancer incidence rates) for cancer patients by U.S. region (in conventional units and in SI units in square brackets).

| Region | Median of access / mi [km] | IQR of access / mi [km] |
|--------|----------------------------|--------------------------|
| Midwest| 35.6 [59.0]                | 58.5 [94.1]              |
| Northeast| 16.1 [25.9]          | 12.1 [19.5]              |
| South  | 34.8 [56.0]                | 24.6 [39.6]              |
| West   | 64.6 [103.9]               | 28.2 [45.4]              |
