Three Incomplete Limestone Stelae from Ihnasya el-Medina
(Herakleopolis Magna)

Hayam H. RAWASH

ABSTRACT

This article deals with publication of three unpublished incomplete limestone stelae from Ihnasya El-Medina necropolis. The first stela was found in 2010, during work digging for a water-pipe project at the depth of five meters underground in front of El-Masharka district. The second and the third stelae were found by some thieves in the region of Ihnasya city. The police officers found two stelae and filed the report under the misdemeanor number 4083/Ihnasya 2009. These stelae were dedicated to the gods Osiris and Anubis; and are now preserved in Ihnasya El-Medina Magazine.

Publishing these three stelae in one article due to that they are from one area, and it seems that they have the same type.

KEYWORDS

Limestone Stelae – Ihnasya el-Medina – Herakleopolis Magna – Incomplete Stelae – false door

INTRODUCTION

The stelae have lost some fragments which are revealed by comparisons between the remains of the right and left sides which contained hieroglyphs and the titles of the stela's owner, as well as between similar stelae from the same period inside Ihnasya necropolis and others. As to the first and the second stelae; comparison can be found, such as the stela of Ndvmi (Inv.Nr.2502/Ihnasya 2007), the stela of Ipj-h3.iš.wt.f (Inv.Nr.2535/Ihnasya

المختصر

يدول هذا البحث نشر ودراسة ثلاثة لوحات غير مكتملة من الحجر الجيري، من جبالة إهناسيا المدينة. وجدت اللوحات الأولى في عام 2010 أثناء حفر مشروع أنابيب المياه، على عمق حوالي خمسة أمتار، أمام منطقة المشركة. أما اللوحتان الثانية والثالثة، اكتشفها بعض أضرار الآثار في منطقة إهناسيا المدينة. وقد وجد أحد صحفيات الشرطة ذلك، ووقع تقرير الشرطة في المحضر رقم 4083/اهناسيا لعام 2009. وقد كرست هذه اللوحات إلى المعبدات أوزري، وأنوبيس، وجميعها محفوظة في مخزن إهناسيا المدينة. ويكشف نشر ودراسة هذه اللوحات في مقال واحد، نظرًا لأن الثلاث لوحات أتى من جبالة واحدة وهي جبالة إهناسيا المدينة، وتنتمي اللوحات إلى نفس النوع من اللوحات.

لوحات من الحجر الجيري – إهناسيا المدينة – هيراكلوبوليس ماجنا – لوحات غير مكتملة – باب مثلي
2010),\(^1\) the stela of \textit{hmm-htp} N.25 Dahshour necropolis),\(^2\) and the stela of \textit{Nny} (N.28 Dahshour necropolis)\(^3\). As for the third stela; one may find comparisons in similar stelae, such as some discovered by the Spanish missions at Ihnasya el-Medina, (register numbers 199, 208, and 408). Through these comparisons we can trace the missing parts of these stelae as follows:

\[1\] - Stela of \textit{Tpi} (Pl.1, fig.1)

A false door stela is belonging to an individual called \textit{Tpi}.

Material: limestone.
Measurement: 60 x 50 x 15 cm.
Place of preservation: Ihnasya El-medina Magazine (Inv. Nr. 2611/ Ihnasya 2011).
State of preservation: The relief and hieroglyphs are in a fairly good state of preservation, rendered in sunken relief.

\textbf{Description}

The stela is divided into three registers. The first register represents the remains of the lintel of the stela, which usually appears under the jambs of similar examples. The first part of the lintel has lost its horizontal section, but would have contained horizontal hieroglyphs with two formulas of \textit{htp -dl -nsw}. The first one begins at the right side of the stela, which as usual, contained the well-known formula for the god Osiris, an offering invocation, title and the name of the owner of the stela \textit{Tpi}. The second register represents the left side of the stela, which is mostly lost except the title \textit{im3lw} and the remains of the owner's figure. Most of the second formula which should be begin on the left side of the stela, was lost, it would usually end with the well-known formula for the god Anubis, offering invocations, titles and the name of the owner of the stela \textit{Tpi}. But we have only the owner's titles and his name with his figure. The third register represents the middle of the stela which usually is containing the cornice; below it are twelve colored flower petals, painted dark yellow and red. These petals separated the lintel of the stela from its main panel. Below is a figure of the stela's owner \textit{Tpi}, who is seated before the offering table in the center of the stela and surrounded by a molding in the shape of square. Lying on this table are typical items; a woven mat, a heap of food, and a goose. Under the offering table there are the \textit{hs} jar, and the pan and jar, which were used in the purification of the deceased. They had a magical significance, meaning that the deceased became free of his sins.\(^4\) Most of the traditional offering formula was lost but through the remains of some letters, one can read as follow "An offering consisting of a thousand of bread, a thousand of beer, a thousand of oxen, a thousand of fowl, a thousand of ointment-jars and a thousand of clothing for the ba of \textit{Tpi}.

The stela's owner figure is seated before the offering table and he is gripping a piece of cloth in the left hand and holding it toward his chest while the right hand extended towards the table. \textit{Tpi} was depicted sitting on a low lion leg chair with back support. Below the owner's figure there are remains of a false door which helps the \textit{k3} of \textit{Tpi} to go back and forth through it, enabling him to see what was happening outside the tomb.

Texts

Most of the upper part of the lintel was lost; these usually is containing, in their upper parts horizontal hieroglyphs written from the middle, two formulae of $\text{htp \ di \ nsw}$. The details of the first one, which run right to left, were lost:

$$[\text{htp \ di \ nsw \ Wsir \ nb \ rbt \ wrr \ f \ ksw \ zpdw \ nr}] \ im\text{n}\text{h}w \ Ipi/////////.$$

[May the king give a boon (to) the god Osiris lord of Busiris, invocation offerings from bread, oxen, and fowl of the revered $Ipi$ ///////////].

Most of the details of the second line, which begins on the left side, were lost:

$$[\text{htp \ di \ nsw \ Inpw \ tpj \ dw.f \ prt \ hrw \ t \ ksw \ zpdw \ nr \ r\text{h} \ nsw}] \ mrj \ nb.f \ m^{3} \ hsj \ f \ im\text{n}\text{h}w \ Ipi.$$

[May the king give a boon (to) the god Anubis who upon its hill, invocation offerings from bread, oxen, and fowl of the king's acquaintance] the real beloved by his master, his praised one, the revered $Ipi$.

The third register is containing a figure of the stela owner $Ipi$, who is seated before the offering table, which as usual supported a woven mat, a heap of food, and a goose. Most of the traditional offering formula was lost but one can read the text as following:

$$h^{3} \ t \ h^{3} \ hnk \ h^{3} \ ksw \ h^{3} \ zpdw \ h^{3} \ mnht \ {n} \ k^{3} \ Ipi.$$

[An offering consisting of] a thousand of bread, a thousand of beer a thousand of oxen, a thousand of fowl [for] the spirit of "$Ipi"'.

Comment

a- This type of stela undoubtedly dated to the First Intermediate Period or the beginning of The Middle Kingdom 2160-1950 BC, because the shape of the stela was very popular during these periods$^{5}$.

b- The owner of the stela's name $Ipi$ was attested from The Old Kingdom,$^{7}$ the First Intermediate,$^{8}$ the Middle Kingdom Periods,$^{9}$ and was still used in the New

V, 26.
Kingdom,\(^8\) and Late Periods (2160-1950 BC).\(^9\) During the excavations, were done by the Spanish mission in Ihnasya el-Medina from 1966-2010. Many false doors stelae were discovered containing the name \textit{Ipi},\(^10\) so this name is considered the second most popular name in Ihnasya after the famous name \textit{htj}.

c- The main title of \textit{Ipi} is lost, the main titles are usually carved on the jamb and the right side of the stela, and these two pieces are missing. The beginning of the traditional title\(^11\) of \textit{Ipi} is lost, but with the existing fragments it can be reconstructed as:

\[ [\textit{r\textit{n\textit{s\textit{w}}} \textit{m\textit{rj \textit{nb.f m3'}} \textit{hsj f} \textit{im\textit{3h\textit{w}} Ipi}: \text{The king's acquaintance, the real beloved of his master, his praised one, the revered Ipi}]\text{.}\(^12\) These titles were found on many stelae at Ihnasya el-Medina.\(^13\) The main title \[ [\textit{r\textit{n\textit{s\textit{w}}}] \text{‘the king's acquaintance’}\] was a dignitary title, but it sometimes indicates to a religious job related to the god Osiris, especially if it listed with other religious titles\(^14\). This title was common in the tombs of the different necropoleis of the First Intermediate Period and the beginning of The Middle Kingdom, for instance the tomb of Impy in Kom El-Fakhry necropolis\(^15\).

d- The main offering formula \textit{htp- di -ns\textit{w}}\(^16\) which was recorded on stelae of the First Intermediate, and the Middle Kingdom was the \textit{htp –di- ns\textit{w}}, dedicated mainly to the gods Osiris\(^17\) and Anubis\(^18\), which had many roles related to the deceased in the

nether world.  

The stela is of the "false doors" type, which was in the shape of doors and bore offerings to gods. This type was known from at least the third dynasty, and it became popular in the first Intermediate Period. By the beginning of the Middle Kingdom, the false door stelae became as the ordinary stelae. The difference between the function of the ordinary funerary stelae and the false doors was that the first aimed to confirm the owner’s possession of his tomb, while the false door aimed to confirm the relationship between the owner and the gods of the nether world, which the formulae on these stela dedicated to them, and also to help the deceased to get in and out his tomb.

[2] - Stela of ʿnhw (Pl.2, fig.2)

A stela of the false door is belonging to an individual called "ʿnhw or ʿnhwi".

Material: limestone.  
Measurement: 76 x 72 x 16 cm.

Place of preservation: Ihnasya El-medina magazine (Inv. Nr. 4083/1- 2010 Ihnasya).

State of preservation: The relief and hieroglyphs are in a fairly good state of preservation, rendered in sunken relief.

**Description**

The stela is stolen from a site near the cemetery of the First Intermediate Period and Middle Kingdom at Ihnasya. It is lost most its upper part, through a comparison of other stelae with what remains of this stela, most of its details can be reconstructed. It contained hieroglyphs for the titles and name of the stela's owner ʿnhw or ʿnhwi. The jamb and the lintel of the stela are lost. The hieroglyphs were written in three registers. The first one represents the remains of the right side, including the right lintel, which contained horizontal hieroglyphs beginning from the middle, with two formulae of htp di nsw. The first formula usually is containing the standard formula for the god Osiris, an offering of invocations, the title and the name of the owner of the stela ʿnhwi. Most of the second register on the left side of the stela is also lost, except the lower part of the stela owner's feet. The upper part of the third register on the middle of the stela is lost. There is a figure of the stela's owner ʿnhwi who is seated before the offering table in the center of the stela and surrounded by a molding in the shape of square. This table usually supported a woven mat and the heap of food, including goose. Most of the traditional offering formula is intact: An offering consisting of {a

thousand of bread], a thousand of beer, a thousand of oxen, a thousand of fowl, a thousand of ointment-jars and a thousand of clothing which belonging to 'nhwî. The stela's owner figure is seated before the offering table and he is holding a piece of cloth in the left hand, gripping it to his chest while the right hand extended towards the table. 'nhwî is depicted sitting on a low lion leg chair with back support. Below the owner's figure are names of scared oils, which are carved around the sides of a false door shape. This false door was believed to help the spirit of 'nhwî to go back and forth through it, enabling him to see what happened outside the tomb. Upon the false door, there is a remnant of the determinative for scared oil which should be sf(j)-hb, the odour of festivals 29 and the name of hkw Oil of parsing. 30 On the left side of the false door there are names of twâ (wt) anointing oils 31, htt (nt) the best of cedar oil 32 and htt (nt) thnw the best of Libyan oil. 33 Most of the left side of the false door is lost which should be begin with the name of "sfT"juniper oil, in the lower of this side there is the name of n-ĥnm, 36 "union oil" also has been translated as nstm – slave. 37

Texts

Most of the upper part of the lintel was lost, which usually contained in its upper part horizontal hieroglyphs extending from its middle, with two formulas of htp -dl-nsw, the details of the first one which on the right side are lost:

[htp dl nsw Wsr nb ðdw prt ħrw t k3w ðpdw nt ìmj-]r m̱ st nrj nb f imḥw 'nhw. 

[May the king give a boon (to) the god Osiris lord of Busiris, invocation offerings from bread, oxen, and fowl for the commander] of the army, the beloved by his master the revered 'nhw.

All details of the second lintel, on the left side were lost. The third register contained a figure of the stela's owner 'nhwî, who is seated before the offering table which usually supported a woven mat and the heap of food, such as goose. There is most of the traditional offering formula, so we can know they were: "An offering consisting of {a thousand of bread}, a thousand of beer, a thousand of oxen, a thousand of fowl, a thousand of ointment-

jars and a thousand of clothing which belonging to {the spirit of}  *nhwi*. The text is as follows:

\[
m (k3) \text{im}³\text{hw} *nhwi <h3 t> \text{h3} \text{hnkt} h3³ \text{ipdw} \text{h3 mnht]}
\]

(to the spirit of) the revered *nhwi* (an offering consisting of) \(<a thousand of bread>, a thousand of beer , a thousand of oxen , a thousand of fowl , a thousand of ointment-jars and a thousand of clothing.

**Comment**

a- This type of stela dates from the First Intermediate Period and the beginning of Middle Kingdom, because the shape of the stela was very popular during this period\(^{38}\).

b- The owner of the stela's name is mentioned two times, once as *nhw* and the second time as *nhwi*. The second shape did not appear before, so this is the first time it is represented at Ihnasya el-Medina, while the first shape appeared at the end of the First Intermediate Period from the time of Montohotep –Nebheptre\(^{40}\), and became very common during the Twelfth and Thirteenth Dynasties\(^{41}\).

c- The main title of "anxw" was the commander of soldiers, while the traditional titles are: who beloved from his master, these titles are:

\[
\text{[imj-]r mšr mry nb.f im}³\text{hw} *nhw \text{‘the commander of the army, the beloved by his master, the revered *nhw’. These titles were found on many stelae at Ihnasya el-Medina, and in many tombs from this period.} ^{43}\]

d- The earliest known complete list of the seven scared oils appeared in the Pyramid Texts,\(^{44}\) later examples appeared in tombs of the Sixth Dynasty.\(^{45}\) Furthermore,

during both the Old Kingdom and the First Intermediate Period, the names of these oils are mentioned on monuments inside and outside Egypt. The seven sacred oils were used in the daily service of the temples and tombs to anoint the statue of the god or the deceased. The Ancient Egyptians anointed the mummy with these oils before wrapping it with linen as this served to bind the linen wrappings to the body. These oils were also connected with the opening of the mouth ritual. In addition to these functions in the funerary rituals and daily service in the temple, the seven sacred oils were used also by the Egyptians in their daily life.

[3] - Stela of Hty- D -  

A fragment of a stela belonging to an individual called Hty-

Material: limestone. Measurement: 1 x 22 x 15 cm.

Place of preservation: Ihnasya El-Medina Magazine (Inv.Nr. 4083/2-2010 Ihnasya).

State of preservation: The relief and hieroglyphs are in a fairly good state of preservation, rendered in sunken relief.

Description

It is suggested that the stela was stolen from a site near from cemetery of The First Intermediate Period at Ihnasya. This part of the stela represents the right side, which indicates that the stela consisted of the upper part, which contained two horizontal lines of hieroglyphs starting from the left side of the stela and connected with two vertical lines in the right of the stela. These two horizontal lines should begin with the famous formula htp-di-nsw, which is followed by Osiris and Anubis. The lower part of this stela contained a horizontal line of hieroglyphs, which also ran from left to right. It probably began with the formula of Anubis, because it finishes with the name of the god Imyut.

It can be suggested that the right side of the stela contained two vertical lines of hieroglyphs, similar to those on the left side, written vertically. From my comparison studies, It can be suggested that the middle part of this stela contained the jamb and the lintel of the stela, with a figure of the stela's owner, Hty-D, who was seated before the offering table in the center of the stela and surrounded by a molding in the shape of square. This table usually contained on its top a woven mat and the heap of food, and a goose with a traditional offering formula: "An offering consisting of a thousand of bread a thousand of beer, a thousand of oxen, a thousand of fowl, a thousand of ointment-jars and a thousand of clothing to the spirit of Hty-D. It could be suggested that the middle of this stela was finished with a false door shape to help the spirit of the Hty-D go back through it and to see what was happening outside the tomb.

Texts

Most of the upper part of the stela was lost, especially the right side which usually contained horizontal hieroglyphs written from left to right, the remaining two lines read as follows:

The first line:

\[
[prt \ hrw t \ k3w \ 3pdw \ nt \ im\3lw \ hr \ ntr \ nt \ imAxw \ xr \ nTr \ aA \ ] \ nb.t^1 \ hty-\textsuperscript{c}3
\]

[Invocation offerings of bread, oxen, and fowl for the revered from the great god] master of the sky hty-\textsuperscript{c}3.

The second line:

\[
[prt \ hrw t \ k3w \ 3pdw \ nt \ im\3lw \ hr \ ntr \ nt \ imAxw \ xr \ nTr \ aA \ ] \ nb.t^2 \ pt \ hty-\textsuperscript{c}3.
\]

[Invocation offerings of bread, oxen, and fowl for the revered from the great god] master of the sky hty-\textsuperscript{c}3.

The right side of the stela contains two verticals lines of hieroglyphs. The outer one reads as follows:

\[
prt \ hrw t \ k3w \ 3pdw \ nt \ r\1h \ ns\1w \ m3\1w \ hs\1f \ n \ st \ ib \ f \ im\3lw \ hr \ hty-\textsuperscript{c}3.
\]

Invocation offerings of bread, fowl for the real king's acquaintance, the praised one, who is seated in his heart, the revered hty-\textsuperscript{c}3.

The inner vertical line as following:

\[
prt \ hrw t \ k3w \ 3pdw \ nt \ mry \ nb \ f \ m3\1w \ im\3lw \ hr \ ntr \ nt \ imAxw \ xr \ nTr \ aA \ nb \ pt \ hty-\textsuperscript{c}3.
\]

Invocation offerings of bread, oxen, and fowl for the real beloved of his master, the revered one, from the great god lord of the sky hty-\textsuperscript{c}3.

In the lower part of the stela are remains of horizontal hieroglyphic writing, written from right to left, which its beginning is lost, as follows:

---

51 The writer mistakenly wrote pt nb.t instead of nb pt as the line in the upper part of the stela.
52 The writer also mistakenly wrote nb.t instead of nb as the inner vertical line.
Comment

a- Undoubtedly the style of this stela is different from the other stelae (1, 2), this style has not been discovered before in cemeteries of the First Intermediate Period, but we have many examples from the cemetery of the Middle Kingdom at Ihnasya. That means that this style was developed during this time.\footnote{It can be suggested that the writer either mistakenly wrote the determinative of the town \( \odot \) instead of the main determinative \( \odot \) of the word \( \text{imy-wt} \), or he used the determinative of the place \( \odot \) with the word \( \text{imy-wt} \) as this word means "who is in the place of mumification" an epithet to Anubis. Or probably the missing part indicated to a geographical district ended with \( \odot \odot \odot \) which \( \text{hty-}^2\odot \) was one of its officials?}

b- The owner of the steal's name \( \text{hty-}^2\odot \) was unknown before in Ihnasya, but it was known during the Middle Kingdom.\footnote{The meaning of the word is uncertain, it takes the shape of an animal skin without a head, holding onto a stick, inside a pan, the tail of the animal usually ended with the lotus flower. This skin was known as "the son of the cow hesat", which was regarded as the mother of Anubis. This skin was used from the First Dynasty and was related to mumification, the role of Anubis in collecting the secretions of Osiris during its mumification and putting them in a sacred leather bottle which was known as the \( \text{imy-wt} \), which became an epithet to Anubis which meant "who is in the place of mumification" or "who is in the wrappings" as Anubis was associated with mumification and responsible for wrapping Osiris. This epithet appeared with the most common epithet of Anubis \( \text{nh} \odot \odot \text{gfr} \) 'lord of the sacred land' on many stelae, especially stelae with the \( \text{htp di nsw} \) formulae. For more details see: U. Köhler, \textit{Das \textit{Imiut}} (Wiesbaden, 1975), 346; R. Wilkinson, \textit{The Complete Gods and Goddess} (London, 2003), 187-192; M.L. Bierbrier, \textit{The British Museum Hieroglyphic Texts from Egyptian Stelae ETC}, Part 2 (Cambridge, 1987), pl. 48; S. Ikram, \textit{Death and Burial in Ancient Egypt} (Cairo, 2015), 36.} There is a stela in the Leiden Museum had the name \( \text{hty-}^2\odot \).\footnote{Spanish missions at Ihnasya el-Medina, registration numbers:199, 208, and 408.} While the origins of this name are found in the Ninth and Tenth Dynasties, where most of Ihnasya’s kings bore this name \( \text{hty} \), it is also a typical name among common people in Ihnasya and others necropolises in the First Intermediate Period and the Middle Kingdom. For instance the owner of tomb number V in Asuit necropolis was called \( \text{hty} \odot \), and another \( \text{hty} \) occupied tomb number III in the Asuit necropolis.\footnote{J.H.Holwerda & P.A.A.Boeser, \textit{Wijngoorden in der Beschrijving van de Egyptische Ver Zameling in het Rijksmuseum van Oudheden te Leiden}, Deel I – XIV, Leiden und S, Gravenhage 1905-1932, Leiden V.109.} Probably adding the epithet \( \odot \) to a name for giving honor and glorification to his owner, and the meaning of the name is "The great \( \text{hty} \)".

\footnote{For the details about the tomb, see PM IV, 264; P. Montet, \textit{Les Tombeaux des Siout et Deir Rifeh}, Kémi III (1930-1935), 107-111; H. Brunner, \textit{Die Texte aus den Gräbern der Herakleopolitenzeit von Siut (\textit{AF}3); Glückstadt, 1937), 11ff; M.El-Khadrady & J.Kahl, ‘The First Intermediate Period Tombs at Asyut Revisited’, \textit{SAK} 32 (2004), .241f; M.Zitman, \textit{The Necropolis of Asiat\textit{.}} (Uitgeveri Peeters and Department Oosterse Studies (Leuven- Paris-Walpole), 2010), 39.}
c- The main titles of ḥty-ṣ3 were: {ḥḥ nswt mṣ mrj.f n st ib.f}, the king’s real acquaintance, his beloved one, and who is seated in his heart. This formula is attested since the Twelfth Dynasty until the Thirteenth Dynasty.⁶⁰

| Stela | Owner's name | Titles | Date |
|-------|--------------|--------|------|
| No.1  | Ipi          | The real king's acquaintance, the beloved by his master, the praised one. | The First Intermediate Period or the beginning of the Middle Kingdom. |
| No.2  | 3nhw (3ħw3)  | The commander of the army, the beloved by his master. | The First Intermediate Period or the beginning of the Middle Kingdom. |
| No.3  | ḥty-ṣ3       | The real king's acquaintance, praised one, and who is seated in his heart. | The Middle Kingdom. |
