Yue Ming et al.

Author comment on "Variations in dissolved and particulate organic carbon dynamics in the lower Changjiang River on time scales from seasonal to decades" by Yue Ming et al., EGUsphere, https://doi.org/10.5194/egusphere-2022-30-AC3, 2022

We gratefully thank Reviewer for your time and valuable comments on our manuscript. We have carefully considered these comments and revised the manuscript accordingly. Our response to reviewers’ comments point by point is given below. The original comments (in blue text) are also provided followed by our detailed response (regular font size). We feel that our manuscript has been much improved and we thank you for the guidance.

Please also note the supplement to this comment:
