Placental transmogrification of the lung associated with unilateral pleural effusion: A case report with a comprehensive review of the literature.  
Respir Med Case Rep. 2019;26:161-4.

Placental transmogrification of the lung presenting as giant bullae with soft-fatty components.  
Eur J Cardiothorac Surg. 2008;33(1):124-6.

Placentoid malformation of the lung.  
Pathologe. 1998;19(2):134-40.

Placental transmogrification of the lung is a histologic pattern frequently associated with pulmonary fibrochondromatous hamartoma.  
Arch Pathol Lab Med. 2002;126(5):562-6.

Placental transmogrification of the lung presenting as a peripheral solitary nodule in a male with the history of trauma: A case report.  
Medicine (Baltimore). 2018;97(18):e0661
