FIGURE 3C

The figure shows Western blot analyses of various protein expressions across different conditions. The proteins and conditions include:

- p-STAT1 Y701
- IRF1
- p-STAT1 S727
- GAPDH
- STAT1
- IRF9
- RSAD2

The gels are divided into lanes labeled as CTRL, FGF7, IFNα, and IFNα/FGF7. The molecular weight markers and protein bands are indicated with respective molecular weights and labels.
