REGULAR PAPERS
Topology Inference for Network Systems: Causality Perspective and Nonasymptotic Performance ................................................................. Y. Li, J. He, C. Chen, and X. Guan 3483
Control-Barrier-Function-Based Design of Gradient Flows for Constrained Nonlinear Programming ............................................................ A. Allibhoy and J. Cortés 3499
LQR and Stabilization for Discrete-Time Systems With Multiplicative Noises and Input Delays ................................................................. H. Wang, H. Zhang, L. Li, and M. Fu 3515
Finite-Time Stabilization of Uncertain Markovian Jump Systems: An Adaptive Gain-Scheduling Control Method ................................................ Z. Cao, Y. Niu, and C. Peng 3531
A Framework for Distributed Estimation With Limited Information and Event-Based Communications ................................................................. J. Yan, Y. Mo, and H. Ishii 3544
Bearing-Based Reliable Cooperative Localization for Multiagent Networks in the Presence of Malicious Measurements .............................. C.-X. Shi and G.-H. Yang 3560
Polyhedral Robust Minkowski–Lyapunov Functions ................................................................................................................................. S. V. Raković and S. Zhang 3576
Simultaneously Stabilizing Networked Systems With Minimal Communication .......................................................................................... A. Colombo, M. Bahraini, M. Zanon, and P. Falcone 3589
Infinite Horizon Optimal LQG Control of Interconnected Systems With Application to Multiarea Power Systems ............................................... Y. Wang and R. Su 3602
A Hitting Time Analysis for Stochastic Time-Varying Functions With Applications to Adversarial Attacks on Computation of Markov Decision Processes .................................................................................................................. A. Yekkehkhany, H. Feng, D. Ying, and J. Lavaei 3615
Extended Kalman Filter-Based Observer Design for Semilinear Infinite-Dimensional Systems ........................................................................ S. Afshar, F. Germ, and K. Morris 3631
Prescribed-Time Control of Nonlinear Systems With Linearly Vanishing Multiplicative Measurement Noise .................................................. W. Li and M. Krstic 3647
Almost-Sure Robust Stabilization of Randomly Switched Linear Systems With Uncontrollable Subsystems ......................................................... L. Y. Wang, G. Yin, F. Lin, M. P. Polis, and W. Chen 3662
Augmented Synchronization of Power Systems .............................................................................................................................................. P. Yang, F. Liu, T. Liu, and D. J. Hill 3673
DOT and DOP: Linearly Convergent Algorithms for Finding Fixed Points of Multiagent Operators ................................................................. X. Li, M. Meng, and L. Xie 3689
Recursive Bayesian Estimation for Discrete-Time Systems With State-Dependent Packet Dropouts: A Cross-Coupled Method .................................................... Q. Liu, Z. Wang, H. Dong, and C. Jiang 3705
Small-Gain Theorem for Safety Verification Under High-Relative-Degree Constraints .................................................................................. Z. Lyu, X. Xu, and Y. Hong 3717

(Contents Continued on Page 3482)
Generalized Multikernel Maximum Correntropy Kalman Filter for Disturbance Estimation ................................................................. S. Li, D. Shi, Y. Lou, W. Zou, and L. Shi 3732
Distributed Optimal Secondary Frequency Control in Power Networks With Delay Independent Stability .................................................. M. Li, J. Watson, and I. Lestas 3748
Stabilization of Systems by Delayed Noisy States ................................. X. Zhao and F. Deng 3764
Event-Triggered Control From Data ..................................................... C. De Persis, R. Postoyan, and P. Tesi 3780
Supervisory Control of Modular Discrete-Event Systems Under Partial Observation: Normality ............................................................... J. Komenda and T. Masopust 3796
An Improved Lyapunov Stability Test of Equilibria Under Frictional Unilateral Contact by Sums of Squares Programming ................. P. L. Várkonyi 3808
Dynamical System Approach for Time-Varying Constrained Convex Optimization Problems .............................................................. R. Raveendran, A. D. Mahindrakar, and U. Vaidya 3822
A Second-Order Generalization of TC and DC Kernels .......................... M. Zorzi 3835
Geometric Characterization of the $H$-Property for Step-Graphons .............. M.-A. Belabbas and X. Chen 3849
Universal Online Convex Optimization With Minimax Optimal Second-Order Dynamic Regret .............................................................. H. Gokcesu and S. S. Kozat 3865
Learning Nonlinear Systems via Volterra Series and Hilbert-Schmidt Operators ................................................................. F. Cacace, V. De Julius, A. Germani, and M. Merone 3881
Active Nodes of Network Systems With Sum-Type Dissipation Inequalities ............................................................ K. Chen and A. Astolfi 3896
Adaptive Synchronization of Uncertain Underactuated Euler–Lagrange Agents ....................................................................................... T. Tao, S. Roy, B. De Schutter, and S. Baldi 3912
Lightweight Distributed Gaussian Process Regression for Online Machine Learning ......................................................... Z. Yuan and M. Zhu 3928

TECHNICAL NOTES

Optimal Control for Mobile Agents Considering State Unpredictability........ C. Qu, J. He, J. Li, X. Duan, and Y. Mo 3944
Strong Consistency and Rate of Convergence of Switched Least Squares System Identification for Autonomous Markov Jump Linear Systems ......................................................................................... B. Sayedana, M. Afshari, P. E. Caines, and A. Mahajan 3952
Convex Decreasing Algorithms: Distributed Synthesis and Finite-Time Termination in Higher Dimension ................................................ J. Melbourne, G. Saraswat, V. Khutana, S. Patel, and M. V. Salapaka 3960
Adaptive Prescribed-Time Stabilization of Uncertain Nonlinear Systems With Unknown Control Directions .............................................. C.-C. Hua, H. Li, K. Li, and P. Ning 3968
Aggregation Method to Strategy Consensus of Large-Size Networked Evolutionary Matrix Games ...................................................... H. Li, S. Wang, and W. Li 3975
Robust Control for Hysteretic Microhand Actuator Using Robust Right Coprime Factorization ......................................................... N. Bu, Y. Zhang, Y. Zhang, Y. Morohoshi, and M. Deng 3982
Distributed Feedback Optimization of Nonlinear Uncertain Systems Subject to Inequality Constraints .................................................... Z. Qin, T. Liu, T. Liu, Z.-P. Jiang, and T. Chai 3989
Adaptive Synchronization of Complex Dynamical Networks: Dealing With Uncertain Impulses ......................................................... S. Zhu, J. Zhou, J. Lü, and J.-A. Lu 3997
Asymptotic Tracking Control for Uncertain MIMO Nonlinear Systems With Guaranteed Performance and Enhanced Controllability .............................................................................. B. Zhou, X. Huang, Y. Song, and F. L. Lewis 4005
Event-Triggered Control Systems Under Stochastic Pulsing Denial-of-Service Attacks .......................................................... D. Zhang, X. Jin, and H. Su 4013
Optimal Dynamic Controller Design for Linear Quadratic Tracking Problems ........................................................................................ J. Zhao, C. Yang, W. Gao, and J. H. Park 4021
Convex Hull Relaxation of Optimal Control Problems With General Nonconvex Control Constraints ..................................................... R. Yang and X. Liu 4028
An LMI-Based Robust Nonlinear Adaptive Observer for Disturbed Regression Models .............................................................. H. Ríos, A. F. de Loza, D. Eijm, and R. Franco 4035
Data-Driven Observability Analysis for Nonlinear Stochastic Systems ............................................................................. P.-F. Massiani, M. Buissin-Fenel, F. Solowjow, F. D. Meglio, and S. Trimpe 4042
Decentralized Nash Equilibria Learning for Online Game With Bandit Feedback ................................................................. M. Meng, X. Li, and J. Chen 4050
Distribution of Roots of Quasi-Polynomials of Neutral Type and Its Application—Part II: Consensus Protocol Design of Multi-Agent Systems Using Delayed State Information .............................................. H. Wang and Q.-L. Han 4058
Consensus of Euler–Lagrange Agents With Internal Model Disturbance Rejection and Interconnection Delays .................................. E. Nutio, I. Sarras, H. Yin, and B. Jayawardhana 4066

(Contents Continued on Back Cover)
| Title                                                                 | Authors                                        | Page |
|----------------------------------------------------------------------|-----------------------------------------------|------|
| Strong Prescribed-Time Stabilization of Uncertain Nonlinear Systems   | Y. Ding, B. Zhou, K.-K. Zhang, and W. Michiels | 4072 |
| by Periodic Delayed Feedback                                          |                                               |      |
| Interpolation With Strictly $\mathcal{F}$-Positive Real Matrix and   | J. Stefanovski                                | 4080 |
| Application to Strong Stabilization                                  |                                               |      |
| Flexible Single-Link Manipulators Control Based on a Full-Order       |                                               |      |
| Transfer Function Model                                               |                                               |      |
| On Minimum Realization of Boolean Control Networks                   | R. Mohsenipour and G. Liu                    | 4086 |
| Perturbation-Tolerant Structural Controllability for Linear Systems  |                                               |      |
| A Lyapunov–Krasovskii Method for Semiglobal Stabilization of a Class | Y. Yu, C. Wang, J.-e. Feng, and G. Chen       | 4094 |
| of Time-Delay Nonlinear Systems With Uncontrollable Linearization by  |                                               |      |
| Linear Feedback                                                      | X. Yu and W. Lin                              | 4110 |
| Event-Triggered Dynamic Quantization for Nonlinear Systems With      |                                               |      |
| One-Bit Data Transmission                                            |                                               |      |
| A Nonlinear Adaptive $H_\infty$ Optimal Control Method Without      | Z. T. Sereshki, H.A. Talebi, and F. Abdollahi | 4126 |
| Solving HJIE: An Analytical Approach                                 |                                               |      |
| Adaptive Spatial Repetitive-Control for Time-Varying Periodic Signals| L. Zhou, D. Gao, J. She, X.-M. Zhang, and H.  | 4134 |
| in a Rotational System                                               | Yan                                           |      |
| Indirect Adaptive Optimal Tracking Switching Control of Nonlinear    | W. Wang, Y. Fu, and J. Fu                     | 4142 |
| Systems                                                             |                                               |      |
| Adaptive Input Delay Compensation Under Event-Based Control Signal  | J. Haddad and B. Mirkin                      | 4150 |
| Implementation                                                       |                                               |      |
| Finite-Time Distributed $H_\infty$ Filtering in Sensor Networks      | X. Zhou, G. Chen, Z. Zeng, and J. Hu          | 4158 |
| With Switching Topology and Two-Channel Stochastic Attacks           |                                               |      |
| Lossless State Compression of Boolean Control Networks               | B. Li, J. Lu, W. Xu, and J. Zhong             | 4166 |
| Agreements of Nonlinear Opinion Dynamics in Switching Social Networks| T.-C. Lee and Y. Su                          | 4174 |

IEEE CONTROL SYSTEMS LETTERS

A PUBLICATION OF THE IEEE CONTROL SYSTEMS SOCIETY

2024 VOLUME 8 NUMBER 5 (PAPERS from 66 to 98)

PAPERS

Statistical Analysis of Block Coordinate Descent Algorithms for Linear Continuous-Time System Identification, R. A. González, K. Classens, C. R. Rojas, J. S. Welsh and T. Oomen .............................................................. pp. 388-393
Adaptive Bipartite Time-Varying Output Formation Tracking of Heterogeneous Multi-Agent Systems, X. Zhao and L. Zhang .............................................................................................................. pp. 394-399
String-Stable Cooperative Adaptive Cruise Control With Minimized Time Headway in the Face of Delayed Communication, H. Köröglu .................................................................................................................. pp. 400-405
A Monotonicity Framework for Stability Verification of Planar Path-Following Controllers, B. Clark and H. A. Poonawala ................................................................................................................................. pp. 406-411
Value Iteration for Linear Quadratic Optimal Control of Single-Input Single-Output Systems via Output Feedback, C. Possieri ......................................................................................................................... pp. 412-417
Feedback Stabilization of Discrete-Time Switched Systems Under Büchi-Constrained Signals, M. Della Rossa, T. Alves Lima and A. Girard ................................................................................................................... pp. 418-423
Distributed Stochastic Optimal Control of Nonlinear Systems Based on ADMM, M. Pierer von Esch, D. Landgraf, M. Steffel, A. Völz and K. Graichen ........................................................................................................ pp. 424-429
A Unified KKL-Based Interval Observer for Nonlinear Discrete-Time Systems, T. N. Dinh and G. Quoc Bao Tran ...................................................................................................................................................... pp. 430-435
Rate of Convergence to the Disease Free Equilibrium for Multi-Population SIS Networks in the Critical Case, M. Ye and B. D. O. Anderson ...................................................................................................................... pp. 436-441
Multi-Agent Discrete-Time Asynchronous Circular Formation Control, D. Zhu and B. Du ........................................ pp. 442-447
A Discrete-Time Integral Sliding Mode Control Law for Systems With Matched and Unmatched Disturbances, M. Rubagotti, G. P. Incremona and A. Ferrara ........................................................................................................ pp. 448-453
Optimal Dynamic Output Feedback Design for Continuous-Time Linear Time-Invariant Systems, Y. Kumar, P. V. Chanekar and S. B. Roy .............................................................................................................. pp. 454-459
Distributed Zone Allocation and Preservation in Multiagent Systems, D. Kurtoglu, T. Yucelen, D. Tran, D. Casbeer and E. Garcia ................................................................................................................................. pp. 460-465
Integral Controlled Lagrangians for Underactuated Mechanical Systems Subject to Position-Dependent Matched Disturbances, E. Franco and F. Forni ........................................................................................................ pp. 466-471
Tractable Approximations of LMI Robust Feasibility Sets, T. Alamo, M. Mammarella, F. Dabbene and M. Szafraniec .............................................................................................................................................. pp. 472-477
Toward eXplainable Data-Driven Control (XDDC): The Property-Preserving Framework, G. Riva and S. Formentin ...................................................................................................................................................... pp. 478-483
For Time-Invariant Delay Systems, Global Asymptotic Stability Does Not Imply Uniform Global Attractivity, A. Chaillot, F. Wirth, A. Mironchenko and L. Brivadis ........................................................................................................ pp. 484-489
The Graded Hautus Test of Controllability for 2-D Systems, D. Pal and E. Zeerz ................................................................................................................................. pp. 490-495
A Newton-Based Dual Update Framework for ADMM in Convex Optimization Problems, M. Aicardi and G. Ferro .............................................................. pp. 496-501
Predictor-Based Adaptive Plant Augmentation Design With Application to Hierarchical Control, D. Invernizzi and A. Serrani .............................................................. pp. 502-507
Fourth-Order Suboptimality of Nominal Model Predictive Control in the Presence of Uncertainty, F. Messerer, K. Baumgärtner, S. Lucia and M. Diehl .............................................................. pp. 508-513
AC-BioSD: A Biomolecular Signal Differentiator Module With Enhanced Performance, E. Alexis, J. L. Avalos, L. Cardelli and A. Papachristodoulou .............................................................. pp. 514-519
Scalable Reachset-Conformant Identification of Linear Systems, L. Lützow and M. Althoff ......... pp. 520-525
Integrated Planning and Control: A Crucial Path Nodes-Based Piecewise Model Predictive Control Strategy, Y. Deng, Z. Zuo, H. Wang and Y. Wang .............................................................. pp. 526-531
A Characterization of All Linear Passivizing Input-Output Transformations of a Passive-Short System: The SISO Case, M. Sharf and D. Zelazo .............................................................. pp. 532-537
Optimal Privacy-Preserving Transmission Schedule Against Eavesdropping Attacks on Remote State Estimation, J. Zou, H. Liu, C. Liu, X. Ren and X. Wang .............................................................. pp. 538-543
Design of Sparse Control With Minimax Concave Penalty, N. Hayashi, T. Ikeda and M. Nagahara.............................................................. pp. 544-549
Exact Model Reduction for Discrete-Time Conditional Quantum Dynamics, T. Grigoletto and F. Ticozzi.............................................................. pp. 550-555
Kron Reduction of Nonlinear Networks, A. v. d. Schaft, B. Besselink and A. -M. Huijzer ............. pp. 556-561
Plant-Order Saturated Output-Feedback Regional Controller Synthesis With Sign-Indefinite Quadratic Forms, S. Pantano Calderón, S. Tarbouriech and L. Zaccarian .............................................................. pp. 562-567
Integral IDA-PBC for Underactuated Mechanical Systems Subject to Matched and Unmatched Disturbances, E. Franco, P. Arpenti, A. Donaire and F. Ruggiero .............................................................. pp. 568-573
A Fusion Estimation Approach for Robust Output Feedback MPC of Multi-Sensor Systems, B. Chen, C. Xu, Z. Wang, X. Qiu and S. Du .............................................................. pp. 574-579
Minimum Energy Density Steering of Linear Systems With Gromov-Wasserstein Terminal Cost, K. Morimoto and K. Kashima .............................................................. pp. 586-591
American Control Conference
ACC 2024
July 8–12, Toronto, Canada

L-CSS option Submission
September 08, 2023 (Passed)

ACC Manuscript Submission
September 22, 2023 (Passed)

Acceptance/Rejection Notice
January 22, 2024

Final Manuscript Submission
March 13, 2024 (Passed)

https://acc2024.a2c2.org/
Conference on
Control Technology and Applications
CCTA 2024

August 21–23, Newcastle upon Tyne, UK

Paper Submission Opens
November 01, 2023

Tutorial Session Proposals Due
February 01, 2024 (Passed)

Paper Submission Due
February 05, 2024 (Passed)

Invited Session Proposals Due
March 01, 2024 (Passed)

Decision Notification
April 08, 2024

Registration Opens
May 01, 2024

Final Camera-Ready Submission
June 15, 2024

https://ccta2024.ieeecss.org/
Conference on Decision and Control

CDC 2024

December 17–19, Milan, Italy

Initial Paper Submissions to L-CSS with CDC Option Due
March 8, 2024 (Passed)
Invited Session Proposals Due
March 15, 2024 (Passed)
Initial Paper Submissions Due
March 22, 2024 (Passed)
Workshop Proposals Due
April 29, 2024 (Passed)
Decision Notification
Mid-July, 2024
Final Submissions Due
September 10, 2024

https://cdc2024.ieeecss.org/
American Control Conference
ACC 2025
July 8–10, Denver, CO, USA

L-CSS option Submission
September 13, 2024

ACC Manuscript Submission
September 27, 2024

Acceptance/Rejection Notice
January 24, 2025

Final Manuscript Submission
March 14, 2025
