**ABSTRACT**

*Euodia ruticarpa* var. *bodinieri* is a medicinal plant recorded in Chinese Pharmacopeia. Here, we report the complete chloroplast (cp) genome sequence of *Euodia ruticarpa* var. *bodinieri*. The cp genome is 158,745 bp in size and includes two inverted repeat regions of 27,101 bp each, which is separated by a large single-copy region of 86,299 bp and a small single copy region of 18,244 bp. A total of 132 genes were predicted, including 37 tRNA, 8 rRNA, and 87 protein-coding genes. Phylogenetic analysis placed *Euodia ruticarpa* var. *bodinieri* under the family Rutaceae.
