Description of Additional Supplementary Files

File Name: Supplementary Data 1
Description: List of unique potential crosslink sites from all individual replicates after manual validation and 5% FDR cut-off.

File Name: Supplementary Data 2
Description: List of crosslink sites from Supplementary Data 1, but in case of multiple identifications of crosslink sites in the different replicates, only the copy of each crosslink site with higher aggregate score was retained.

File Name: Supplementary Data 3
Description: List of crosslink sites from Supplementary Data 2, but only crosslink sites with an aggregate score higher than 250 were retained.
