ABSTRACT:
This research objective are analyze the common pattern in Jakarta Post and ‘Kompas’ newspaper editorials. The research method used was a mixed method. The research instrument is checklist. The procedure classifies all objects (10 texts Jakarta Post newspaper editorials and 10 texts ‘Kompas’ newspaper editorials) on the thematic progression patterns are checklist. The result shows that the thematic progression in Jakarta Post and ‘Kompas’ newspaper editorials are found 3 patterns of thematic progression; 10 texts derived theme; 8 texts Constant progression, and 2 text linear progression. The different on thematic progression in Jakarta post and ‘Kompas’ newspaper editorials is difference, the difference of sequence in the patterns between Jakarta Post and ‘Kompas’ newspaper editorials. The Conclusion Thematic Progression in Jakarta Post and ‘Kompas’ newspaper editorials are derived theme and Constant progression.

Keywords: Thematic Progression, Jakarta Post, ‘Kompas’, Editorials, Checklist

Abstrak: Tujuan penelitian ini adalah menganalisis pola umum di Jakarta Post dan editorial surat kabar ‘Kompas’. Metode penelitian yang digunakan adalah metode campuran. Instrumen penelitian ini adalah ceklist. Prosedur penelitian mengklasifikasikan semua objek (10 teks tajuk rencana di koran Jakarta Post dan 10 teks tajuk rencana di koran ‘Kompas’). Pada pola perkembangan tematik adalah daftar ceklist. Hasilnya menunjukkan bahwa tema dalam Tajuk rencana di koran Jakarta Post dan ‘Kompas’ ditemukan 3 pola perkembangan tematik; 10 teks berdasarkan tema, 8 teks Perkembangan konstan, dan 2 tek perkembangan linier. Perbedaan antara tajuk rencana di koran Jakarta dan ‘Kompas’ ada perbedaan, perbedaannya itu ada pada urutan pola antara tajuk rencana di koran Jakarta Post dan ‘Kompas’. Kesimpulan pengembangan Tematik tajuk rencana di koran Jakarta Post dan ‘Kompas’ adalah berasal dari tema dan perkembangan Konstan.

KATA KUNCI: Pengembangan Tematik, Jakarta Post, ‘Kompas’, Editorials, Ceklist
INTRODUCTION

Texts are any of various genres types linguistics forms. They can be spoken and written. Spoken texts are those like speeches. News at Television and radio, conversation, and other oral communication. While written texts are newspapers, books, novels, letters, and other written languages Brown (1994).

Thematic Progression is a significant contribution to text coherence. Coherence is the logical connections which readers perceive in a written or oral text. It refers to the understanding that the reader derives from the text. A text is said to have global coherence, if it hangs together as a whole, which is referred to as “discourse flow” by Halliday (2014). Discourse flow is managed by two related systems such as theme or thematic progression and structure. The theme is often given information (familiar to the reader of from the context), and the Rhyme consists of new information. Fries (1995) notes the theme orients reader to message which is perceived and provides a framework for messages interpretation. Thematic progression is another way of promoting coherence text, by succession of themes across sentences and paragraph. Different thematic progression serve different roles an creating a strong topical focus in a text, allowing new information to be developed or introducing a number of different information pieces.

Thematic Progression is a significant contribution to text coherence. Coherence is the logical connections which readers perceive in a written or oral text. It refers to the understanding that the reader derives from the text. A text is said to have global coherence, if it hangs together as a whole, which is referred to as “discourse flow” by Halliday (2014). Discourse flow is managed by two related systems such as theme or thematic progression and structure. The theme is often given information (familiar to the reader of from the context), and the Rhyme consists of new information. Fries (1995) notes the theme orients reader to message which is perceived and provides a framework for messages interpretation. Thematic progression is another way of promoting coherence text, by succession of themes across sentences and paragraph. Different thematic progression serve different roles an creating a strong topical focus in a text, allowing new information to be developed or introducing a number of different information pieces.

Danes (1974) identifies three patterns of thematic progression for example Pattern 1 represents a linear progression where theme follows from preceding Rhyme and so on; Pattern 2, a progression where each theme is derived from a more general macro-theme; and Pattern 3, a constant progression where the theme is kept from clause to clause.

Jakarta Post is an English language newspaper in Indonesia. The paper is owned by PT Bima Media Tenggara, and the head office is in the national’s capital, Jakarta. The Jakarta Post was started as collaboration among four Indonesian media under the urging of information Minister Ali Murtopo and politician Jusuf Wanadi. And then the Jakarta Post is going online. This newspaper also available on the web. The Jakarta Post.com is more than just extension of the information in Indonesia.
Kompas is an Indonesia national newspaper, published by Kompas Gramedia. It has been in existence since June, 1965. Kompas also manages an online portal KOMPAS.com, which contains updated news and the digital version of the paper.

Comparative Study a concepts thematic progression in Jakarta Post and ‘Kompas’ Newspaper Editorials. Coherence Strategy is one where the elements strategy and reinforce each other thematic progression the pattern: linear, derived, and constant progression. A coherence strategy produces more value, with each element of the strategy producing more because of the present of the other elements. but in this research just restricted three pattern.

There are studies on these topics such as from Wei (2016). It analyzed the speakers and writers organize their messages in a way which make them integrate into the unfolding text smoothly and it makes a significant contribution to the coherence of a text. It can connections that listeners’ or readers’ perception in a written or oral text.

The second research on this topic was conducted by Eva’s (2013) She found thematic progression letter analysis on Reader’s forum in Jakarta Post. She found that: 1) Zigzag Theme, 2) Re-iterate theme, 3) Blending between those thematic development and 4) No thematic development.

The last study on this topic was conducted by Valeria (2015) she analyzed The schematic structure of news item text. Newspaper and article text from Jakarta Post. She found the similarity of texts is used for declarative mood type in the two tests, but there is only one interrogative mood type found in The Jakarta Post (TJP).

The studies above are important research to know about the thematic progression. However, there is no comparative study about thematic progression in Jakarta Post and ‘Kompas’ Newspaper Editorial. Research will analyze the text in Jakarta Post and ‘Kompas’ Newspaper Editorials used the pattern 1, 2, and 3. According Danes (1974) identifies three patterns of thematic progression: Pattern 1 represents a linear progression where the theme follows from the preceding Rheme and so on; Pattern 2, a progression where each theme is derived from a more general macro-theme; and Pattern 3, a constant progression where the theme is kept from clause to clause. Texts are any of various genres types linguistics forms. They can be spoken and written. Spoken texts are those like speeches, News at Television and radio, conversation, and other oral communication. While written texts are newspapers, books, novels, letters, and other written languages Brown (1994).

Thematic Progression is a significant contribution to text coherence. Coherence is the logical connections which readers perceive in a written or oral text. Thematic progression is another way of promoting coherence text, by succession of themes across sentences and paragraph. Different thematic progression serve different roles an creating a strong topical focus in a text, allowing new information to be developed or introducing a number of different information pieces.

Danes (1974) identifies three patterns of thematic progression for example Pattern 1 represents a linear progression where theme follows from preceding Rhyme and so on; Pattern 2, a progression where each theme is derived from a more general macro-theme; and Pattern 3, a constant progression where the theme is kept from clause to clause.

**Jakarta**

Post is an English language newspaper in Indonesia. The paper is owned by PT Bima Media Tenggara, and the head office is in the national’s capital, Jakarta. The Jakarta Post was started as collaboration among four Indonesian media under the urging of information Minister Ali Murtopo and politician Jusuf Wanadi. And then the Jakarta Post is going online. This newspaper also available on the web. The Jakarta Post.com is more than just extension of the information in Indonesia.

**Kompas** is an Indonesia national newspaper, published by Kompas Gramedia. It has been in existence since June, 1965. Kompas also manages an online portal KOMPAS.com, which contains updated news and the digital version of the paper.

Comparative Study a concepts thematic progression in Jakarta Post and ‘Kompas’ Newspaper Editorials. Coherence Strategy is one where the elements strategy and reinforce each other thematic progression the pattern: linear, derived, and constant progression. A coherence strategy produces more value, with each element of the strategy producing more because of the present of the other elements. but in this research just restricted three pattern.

There are studies on these topics such as from Wei (2016). It analyzed the speakers and writers organize their messages in a way which make them integrate into the unfolding text smoothly and it makes a significant contribution to the coherence of a text. It can connections that listeners’ or readers’ perception in a written or oral text.

The second research on this topic was conducted by Eva’s (2013) She found thematic progression letter analysis on Reader’s forum in Jakarta Post. She found that: 1) Zigzag Theme, 2) Re-iterate theme, 3) Blending between those thematic development and 4) No thematic development.

The last study on this topic was conducted by Valeria (2015) she analyzed The schematic structure of news item text. Newspaper and article text from Jakarta Post. She
found the similarity of texts is used for declarative mood type in the two tests, but there is only one interrogative mood type found in The Jakarta Post (TJP).

The studies above are important research to know about the thematic progression. However, there is no comparative study about thematic progression in Jakarta Post newspaper editorials. Research will analyze the text in Jakarta Post and ‘Kompas’ Newspaper Editorials used the pattern 1, 2, and 3. According Danes (1974) identifies three patterns of thematic progression: Pattern 1 represents a linear progression where the theme follows from the preceding Rheme and so on; Pattern 2, a progression where each theme is derived from a more general macro-theme; and Pattern 3, a constant progression where the theme is kept from clause to clause. From the background above, the research formulated problems. Of the research follow:

1. What are the common pattern of Thematic Progression in Jakarta Post newspaper editorials?
2. What are the common pattern of Thematic Progression in ‘Kompas’ newspaper editorials?
3. What are the different (if available) between the thematic progression pattern in Jakarta Post and ‘Kompas’ newspaper editorials?

**METHOD**

This research was genre-based study can be categories as mix method study. The main objective of this study was Thematic progression in Jakarta Post and ‘Kompas’ newspaper editorials. Therefore, in order to gain the objective, the current study employed Jakarta Post and ‘Kompas’ newspaper editorials based on the research method with pattern-based approach.

The data of this study were taken from 20 texts newspaper editorial (10 texts Jakarta Post and 10 texts ‘Kompas’ newspaper editorials). That was quite understandable since the practice done so far, as interest to read newspaper editorials, The editorials language was usually formal as they directed at a reading public who is already informal about current events but who wishes to read about the wider implications of events in news. The various formality of the language, however, from a large newspaper to a small provincial newspaper. More importantly, the language of editorials is persuasive. Therefore, it dragged the writer to employ only Thematic Progression in Jakarta Post and ‘Kompas’ newspaper editorials. study were summarized in Table 3.1 below.

| No | Newspaper      | Code | F | %  |
|----|----------------|------|---|----|
| 1. | Jakarta Post   | JP   | 10| 50 |
| 2. | ‘Kompas’       | K    | 10| 50 |
|    | **Total**      |      | 20| 100|

Table 1. The distribution of the newspaper editorials
As indicated in Table 1, the convenient samples of 20 texts newspapers editorials were selected. Ten were from Jakarta Post and ten were from 'Kompas'. The distribution of the newspaper editorials, as presented in Table 3.1, represents the distribution of Thematic Progression in Jakarta Post and 'Kompas' newspaper editorials and selected based on purposive sampling technique. Only the Thematic Progression in Jakarta Post and 'Kompas' newspaper editorials.

The newspaper editorials were randomly obtained through the writer's consent and taken from Jakarta Post and 'Kompas' newspapers in Indonesia. The decision about the number of 20 editorials included Jakarta Post and 'Kompas' newspaper editorials. The minimum requirement for number of text to be included in a quantitative analysis was 20 texts. In addition, another reason for selecting 20 newspaper editorials was also made based on the assumption that this present study on only editorials, so that the number of 20 texts newspaper editorial.

The research object was the text appeared in the Jakarta Post and 'Kompas' Newspaper Editorials. The research was common pattern Thematic progression in Jakarta Post and 'Kompas' Newspaper Editorials. The total object of reading texts taken from 10 texts in Jakarta Post and 10 texts from 'Kompas' newspaper editorials. The total object were 20 Texts.

The sequence of the research procedures will be followed: First Collect the texts in Jakarta Post and 'Kompas' newspaper editorials. Second Give the code and number at Editorials in each text. Third, Find theme and rheme in reading text as the object on analysing. The data were Jakarta Post 10 texts and 'Kompas' 10 texts in Newspaper Editorials, so total were 20 Texts. Fourth Marked Thematic Progression (Theme and Rheme) all texts in Jakarta Post and 'Kompas' newspaper editorials. Fifth Identify the text based pattern Thematic Progression of the text and classified the text as Pattern taken the common pattern. Sixth Checklist the of the all object (20 Texts) based the patterns thematic progression in Table instrument. Seventh Analyze the all object, so that the data was comparison research and co-research common pattern thematic progression in Jakarta Post and 'Kompas' Newspaper Editorials.

Since this study concerns three genres analysis, the research was employ a checklist contain newspaper editorials as the main instrument in analyzing the data. The newspaper editorials employed for analyzing the text sections of the thematic progression in Jakarta Post and 'Kompas' Newspaper editorials of patterns was draw or pattern from Danes (1974).

The instrument in this research was checklist the table instrument after the text finish Marked Thematic Progression (Theme and Rheme) in the text continue the 20 texts with instrument checklist. The research draw a table containing the texts, and based the pattern of the texts which will analyzed by research and co-research. Co-research was Eka Puspita. She was the college student S2 Bahasa Inggris UNIB.
In this research, the data was collected by using documentation. According to Arikunto (1998), documentation method collects the data about variable from newspaper, note, book, magazine, etc. The documentation is the 10 texts in Jakarta Post and 10 texts in Kompas editorials. In collecting the data, the researcher used co-researcher to avoid faultiness, and doubtless. (Hopkin, 1993) suggested that the researcher can use partnership or collaborative observation which is particularly relevant. He also said that partner must be somebody with whom the researcher can work comfortably. The researcher used co-researcher who has an experience about the subject being investigated. The research and co-research first filling the marked appropriate with the procedures.

Each of reading text was to get the general meaning or impression of content. After then, each reading was analyzed by marking the pattern classified as Theme and Rheme text which appeared in the Jakarta Post and ‘Kompas’ newspaper editorials. All the marked were collected and tabulated according to the giving concept.

The comparison between two research and co-research analyzed by using reliability technique. To see whether the checklist was reliable or not, research used inter rater reliability. Weir (1993) said that inter rater reliability refers to the degree of similarity between different examiner. It is often that work marked independently by two different markers, with their being averaged. This reliability measured a correlation coefficient.

In this research the technique for Analyzing data:Certify the keyword of each pattern Linear Progression, Derived Theme and Constant Progression, the results of identification in the cumulative or summing based on the progression pattern, Rejection based the pattern Linear Progression, Derived Theme and Constant progression, Identify and calculate the most frequently used patterns in Jakarta Post and ‘Kompas’ Newspaper editorials, Finding/identifying the difference of progression.
pattern between text in Jakarta Post and ‘Kompas’.

To achieve the reliability of data analysis, this study employed data triangulation analysis in which inter-rater reliability analysis was concluded. This to ensure the reliability of the textual analysis where all of these texts were all the texts choosen from the newspaper editorial and analyzed by an expert as an independent rater, so that different individuals can identify the boundary of communicative pattern at a sufficiently high level. The co-research was trained who to code the text into its possible communicative pattern with the use of research instrument as previously explained in order to assure that the co-research clearly understood how to code the Newspaper Jakarta Post and ‘Kompas’ section. Then, the co-research was asked to identify the possible moves selected newspaper and if any miscodingart occurred then a discussion, negotiation and clarification will be held in order to reach an agreement between the research and co-research. Last, the co-research was work independently it code all texts. The 10 texts Jakarta Post and 10 texts ‘Kompas’ the Total 20 Texts.

Then she was trained to identify thematic progression in Jakarta Post and ‘Kompas’ newspaper editorial in marked theme and Rheme in text newspaper editorial and concluded by pattern Thematic Progression taken the common based the pattern after then using the checklist based on pattern by Danes (1974). The co-research was given 20 texts Jakarta Post and ‘Kompas’ newspaper editorials selected from 20 of texts Jakarta Post and ‘Kompas’ newspaper editorials. She classified all text based pattern Thematic Progression using the checklist based on Danes (1974). Finally, the result of inter rater/coder analysis as cited in Kanoksilapatham (2005) to ensure correspondence in the identification of pattern. The percent agreement was calculated using the following formula:

\[
\frac{A}{(A+D)} \times 100\%
\]

Where:

\(A\) = the number of agreements
\(D\) = the number of disagreements (Dobahkti, 2011)

To know the data strength agreement, the scale value is formulated as follow:

| Value of Kappa | Level of Agreement | % Data that are Reliable |
|----------------|--------------------|--------------------------|
| 0 – 20         | None               | 0 – 4 %                  |
| 21 – 39        | Poor               | 3 – 15%                  |
| 40 – 59        | Fair               | 15 – 35 %                |
| 60 – 74        | Good               | 35 – 63 %                |
| 75 – 90        | Excellent          | 64 – 81%                 |
| Above 90       | Almost Perfect     | 82 – 100%                |

Table 3. Interpretation of Cohen’s Kappa
Through this calculation, the correlation between the research and co-research coding for each text newspaper editorial. The coefficient analysis of Cohen’s Kappa as cited in Kanoksilapatham (2005) was presented in figure 3.3. It was where the Cohen’s Kappa has an upper limit of 1.00 and a lower limit of 0.00 (Brown, 1996). The rules for the interpretation of Cohen’s Kappa are summarized as follows: less than 0.40 is poor, 0.40 – 0.59 is fair, 0.60 – 0.74 is good, and more than 0.75 is excellent (Kanoksilapatham (2005).

**RESULTS AND DISCUSSION**

There were 20 texts newspaper editorials theses analyzed in this study. Ten were selected from Jakarta Post (JP) and ten were ‘Kompas’ (K) newspaper editorials. To measure the reliability of the textual analysis, this study employed data triangulation analysis. As shown in table 4. The result of the inter-coder reliability analysis showed 95% agreement between research and co-research. It indicated that there was a high agreement between research and co-research which implies that the reliability of the result can be accepted.

| No | Pattern                | Total Text | Agreed Analysis | Cohen’s Kappa | Percentage |
|----|------------------------|------------|-----------------|---------------|------------|
| 1. | Linear Progression     | 20         | 2 texts         | .10           | 10%        |
| 2. | Derived Theme          | 20         | 10 texts        | .50           | 50%        |
| 3. | Constant progression   | 20         | 7 texts         | .35           | 35%        |
| Total |                        | 19 texts   |                 | .95           | 95%        |

From table 4 above there are results research and co-research reliability analysis Thematic Progression in Jakarta Post newspaper editorials. First, common pattern is Derived Theme 10 texts (50%). Second, common is Constant Progression 7 texts (35%) and third, common pattern is Linear progression 2 texts (10%). The totals agreed analysis research and co-research were reached (95%) covering 19 texts. It meant the reliability result was high and accepted.

The first analysis in this study is focused on occurrence possible of Thematic Progression in Jakarta Post newspaper editorials. The data analysis results revealed that the Thematic Progression as are presented in table 5 below:

**Table 5. Thematic Progression in Jakarta Post newspaper editorials**

| No  | Pattern             | Frequency | Percentage |
|-----|---------------------|-----------|------------|
| 1.  | Constant progression| 5 texts   | 50%        |
| 2.  | Derived Theme       | 4 texts   | 40%        |
| 3.  | Linear Progression  | 1 text    | 10%        |
| Total |                    | 10 texts  | 100%       |
As can be noticed in Table 5. The common pattern of thematic progression in Jakarta Post newspaper editorials was Constant progression. It meant the Constant Progression was reached (50%) covering 5 texts. Constant Progression result was high and accepted from the other pattern.

The second analysis in this study is on identifying which common pattern of Thematic Progression in 'Kompas' newspaper editorials are Constant progression, Derived Theme, and Linear Progression. The results are presented in Table 6 below:

Table 6. Thematic Progression in 'Kompas' newspaper editorials

| No | Pattern          | Frequence | Percentage |
|----|-----------------|-----------|------------|
| 1. | Derived Theme   | 6 texts   | 60%        |
| 2. | Constant Progress | 3 texts | 30%       |
| 3. | Linear Progress | 1 text    | 10%        |
|    | Total           | 10 texts  | 100%       |

As can be noticed in Table 6. The Common pattern of thematic progression in ‘Kompas’ newspaper editorials are Derived Theme were reached (60%) covering 6 texts. It meant more than half occur the pattern Derived Theme the frequency 60%.

The common Pattern of the Thematic Progression in Jakarta Post and ‘Kompas’ newspaper editorials: Ten Texts Jakarta Post and Ten texts ‘Kompas’ newspaper editorials in different texts of authors have been analyzed in this research. There are three possible pattern of review Jakarta Post newspaper editorials, there are pattern: 1) Linear Progression, 2) Derived Theme, 3) Constant Progression. The analysis results are show in Table 7 below.

The analysis results presented with follows table.

Table 7. Thematic Progression in Jakarta Post and 'Kompas' newspaper editorials.

| No | Pattern         | Jakarta Post Newspaper | 'Kompas' Newspaper | Total |
|----|-----------------|-------------------------|--------------------|-------|
|    | Pattern         | Freq                    | Freq               | Freq  |
| 1. | Derived Theme   | 4 texts                 | 6 texts            | 10    | 50%   |
| 2. | Constant Progress | 5 texts                | 3 texts            | 8     | 40%   |
| 3. | Linear Progress | 1 text                  | 1 text             | 2     | 10%   |
|    | Total           | 10 texts                | 10 texts           | 20    | 100%  |

In Table 7. There were some scholarship between Jakarta Post and ‘Kompas’ newspaper in using thematic progression. Such as both of them use use three types of thematic progression, for example. Derived Theme, Constant Progression and Linear Progression. Both of them used Derived Theme on general implantation on writing the news for their media.

**Discussion**

The first objective of this research is the common pattern of Thematic Progression in Jakarta post newspaper editorials. The results showed that all 10 texts. All were newspaper editorials adopted three pattern proposed by Danes (1974). Including Pattern Linear progression, Derived Theme and Constant Progression. The common pattern of Thematic Progression in Jakarta Post newspaper editorials. That in text was the most common pattern Constant Progression. It seems progression not in accordance with the described in the sequence by (Danes 1974). Between pattern Derived Theme and Linear progression. Constant progression command pattern in Jakarta Post newspaper editorials. It meant half form 10 text occur the pattern Constant Progression the frequency 50% and Derived Theme the frequency 40%.

The advantages the Constant Progression was successive clauses retain the same there or referent in initial times on problems within the labour party. Advantages Derived theme will followed the themes connect to implicit overall ‘Hypertheme’ of the whole text and advantages Linear progression is a logical means of creating cohesion is logical means of creating cohesion but less obtrusive than constant progression. It may however seem plodding it overused. According Danes (1974) Pattern Constant Progression, a constant progression where the theme is kept from clause to clause. This mean that the Jakarta Post newspaper editorials used a simple pattern because it rarely used a pattern Linear Progression.

The second objective of this research was to common pattern of Thematic Progression in ‘Kompas’ newspaper editorials. The results shown that all 10 texts. All were newspaper editorials adopted three pattern proposed by Danes (1974). Including Pattern Linear progression, Derived Theme and Constant Progression. The common pattern of Thematic Progression in ‘Kompas’ newspaper editorials. The text was the most common pattern Derived Theme. It seems progression not in accordance with the described in the sequence by (Danes 1974). Between pattern Constant Progression and Linear progression. Derived Theme command pattern in ‘Kompas’ newspaper editorials. It meant more than half occur the pattern Derived Theme the frequency 60% and Constant Progression the frequency 30%.

The advantages of derived themes were connected to implicit overall ‘Hypertheme’ of the whole text, advantages the Constant Progression, successive clauses retain the same there or referent in initial times on problems within the labour party and advantages of Linear progression was a logical means of creating cohesion logical means of creating cohesion but less obtrusive than constant progression. It may however seem plodding it overused. According Danes (1974) Pattern Derived Theme, a progression where each theme is derived from a more general macro-theme. This mean that the Jakarta Post newspaper
editorials used a simple pattern because it rarely used a pattern Linear Progression.

The last objective, The different between the thematic progression pattern in Jakarta Post and ‘Kompas’ newspaper editorials. Difference, thematic progression pattern in Jakarta Post are Constant and Derived Theme. Where as thematic progression pattern in ‘Kompas’ are Derived Theme. Its means the some differences of Thematic Progression pattern between Jakarta Post and ‘Kompas’ pattern progression, In Jakarta Post are Constant Progression and Derived Theme in ‘Kompas’ are Derived Theme and Constant Progression. This means that both of these newspaper chose to use a simple pattern, and rarely using pattern Linear Progression. This is probably in Jakarta Post and ‘Kompas’ newspaper editorials caused or in the intention of ease readers and interested in reading editorials or probably readers early read newspaper. It means that the writer of “editorials in Jakarta Post and ‘Kompas’ mostly dominant the texts by using derived theme and constant progression. It is informative, easier and understand.

The current finding of justifying research based on the knowledge gaps is also difference Jing Wei (2016). It analyzed the speakers and writers organize their messages in a way which make them integrate into the unfolding text smoothly and it makes a significant contribution to the coherence of a text. It can connections that listeners’ or readers’ perception in a written or oral text. The contrast, the way for justifying the research project based on the knowledge gap in newspaper editorial of the this study difference from the finding of Eva’s (2013) She found thematic progression letter analysis on Reader's forum in Jakarta Post. The finding were: 1) Zigzag Theme, 2) Re-iterate theme, 3) Blending between those thematic development and 4) No thematic development. The way for justifying the research project based on the knowledge gap found The Thematic Progression in newspaper editorial of this study were difference of the finding in the last study on Valeria (2015) she analyzed The schematic structure of news item text. Newspaper and article text from Jakarta Post. She found the similarity of texts is used for declarative mood type in the two tests, but there is only one interrogative mood type found in The Jakarta Post (TJP).

**CONCLUSION AND SUGGESTION**

Since this research concern in investigating the pattern in thematic progression, Thematic Progression in Jakarta Post and ‘Kompas’ Newspaper Editorials. The output of this research was conclude the most frequent pattern of text in the newspapers. Based on the finding of thematic progression analysis. Several conclusions could be draw pattern from this study. In term of the thematic system, it was found that two patterns of thematic progression are employed in newspaper editorials. First, common pattern of Thematic Progression in Jakarta Post newspapers editorials are Constant Progression and Derived Theme. Second, common pattern of Thematic Progression in ‘Kompas’ newspaper editorials are
Derived Theme and Constant Progression. Finally, difference on thematic progression pattern in Jakarta Post and 'Kompas' newspaper editorials. In the Thematic Progression in Jakarta Post newspaper editorials are Constant Progression and Derived Theme whereas as the Thematic Progression in 'Kompas' newspaper editorials are Derived Theme and Constant Progression. The differences exist in the order of patterns of topic progression.

**SUGGESTION**

Based on the finding and the conclusions, the research would like to contribute some suggestions:

1. For the teachers. It can be reference for teaching mainly in application of language element about thematic progression. It is as implication of the theories to practice in using thematic for mass media writing and reading as sampling for using it.
2. For the students. It is as example for using thematic progression in daily life. Students were more understand for its implantation clearly.
