In the article by Saint-Maurice et al, “Moderate-to-Vigorous Physical Activity and All-Cause Mortality: Do Bouts Matter?,” which published online March 22, 2018, and appeared in the March 20, 2018 issue of the journal (J Am Heart Assoc. 2018;7:e007678. DOI: 10.1161/JAHA.117.007678), on page 1, under “Methods” section, the authors stated that their data and methods would not be made available to other researchers. For clarification, that statement has been revised as follows: “The data, analytic methods, and study materials are available to other researchers for purposes of reproducing the results or replicating the procedure. Data are available at https://wwwn.cdc.gov/nchs/nhanes/Default.aspx and additional details about the analytical methods can be provided upon request.”

The authors regret the error.

The online version of the article has been updated and is available at https://www.ahajournals.org/doi/10.1161/JAHA.117.007678.
