Reporting Checklist for Life Science Articles (updated January 2023)
This checklist is adapted from Materials Design Analysis Reporting (MDAR) Checklist for Authors. MDAR establishes a minimum set of requirements in transparent reporting in the life sciences (see Statement of Task: 10.31222/osf.io/9sm4x). Please follow the journal’s guidelines in preparing your article.

Please note that a copy of this checklist will be published alongside your article.

Abridged guidelines for figures
1. Data
The data shown in figures should satisfy the following conditions:
   - the data were obtained and processed according to the field’s best practice and are presented to reflect the results of the experiments in an accurate and unbiased manner.
   - ideally, figure panels should include only measurements that are directly comparable to each other and obtained with the same assay.
   - plots include clearly labeled error bars for independent experiments and sample sizes. Unless justified, error bars should not be shown for technical replicates.
   - if n>20, the individual data points from each experiment should be plotted. Any statistical test employed should be justified.

2. Captions
Each figure caption should contain the following information, for each panel where they are relevant:
   - a specification of the experimental system investigated (e.g. cell line, species name).
   - the assay(ies) and method(s) used to carry out the reported observations and measurements.
   - an explicit mention of the biological and chemical entity(ies) that are being measured.
   - an explicit mention of the biological and chemical entity(ies) that are being measured.
   - the exact sample size (n) for each experimental group/condition, given as a number, not a range.
   - a description of the sample collection allowing the reader to understand whether the samples represent technical or biological replicates (including how many animals, litters, cultures, etc.).
   - a statement of how many times the experiment shown was independently replicated in the laboratory.
   - definitions of statistical methods and measures:
     - common tests, such as t-test (please specify whether paired vs. unpaired), simple t-tests, Wilcoxon and Mann-Whitney tests, can be unambiguously identified by name only, but more complex techniques should be described in the methods section;
     - are tests one-sided or two-sided?
     - are there adjustments for multiple comparisons?
     - exact statistical test results, e.g., P values = x but not P values < x;
     - definition of ‘center’ values as median or average;
     - definition of error bars as s.d. or s.e.m.

Please complete ALL the questions below. Select "Not Applicable" only when the requested information is not relevant for your study.

Materials

| Newly Created Materials | Information Included in the manuscript? | In which section is the information available? |
|-------------------------|----------------------------------------|-----------------------------------------------|
|                         | Not Applicable                          | (Reagents and Tools Table, Materials and Methods, Figures, Data Availability Section) |

| Antibodies              | Information Included in the manuscript? | In which section is the information available? |
|-------------------------|----------------------------------------|-----------------------------------------------|
|                         | Not Applicable                          | (Reagents and Tools Table, Materials and Methods, Figures, Data Availability Section) |

| DNA and RNA sequences   | Information Included in the manuscript? | In which section is the information available? |
|-------------------------|----------------------------------------|-----------------------------------------------|
| Short novel DNA or RNA including primers, probes: provide the sequences. | Yes | (Reagents and Tools Table, Materials and Methods, Figures, Data Availability Section) |

| Cell lines              | Information Included in the manuscript? | In which section is the information available? |
|-------------------------|----------------------------------------|-----------------------------------------------|
|                         | Not Applicable                          | (Reagents and Tools Table, Materials and Methods, Figures, Data Availability Section) |

| Experimental animals    | Information Included in the manuscript? | In which section is the information available? |
|-------------------------|----------------------------------------|-----------------------------------------------|
|                         | Not Applicable                          | (Reagents and Tools Table, Materials and Methods, Figures, Data Availability Section) |

| Plants and microbes     | Information Included in the manuscript? | In which section is the information available? |
|-------------------------|----------------------------------------|-----------------------------------------------|
|                         | Not Applicable                          | (Reagents and Tools Table, Materials and Methods, Figures, Data Availability Section) |

| Human research participants | Information Included in the manuscript? | In which section is the information available? |
|-----------------------------|----------------------------------------|-----------------------------------------------|
|                             | Not Applicable                          | (Reagents and Tools Table, Materials and Methods, Figures, Data Availability Section) |

Design

If your work benefited from core facilities, was the service mentioned in the acknowledgments section?

Yes

Your Funding and Acknowledging Core Facilities in your Manuscript

Prepared by: Yoav Peleg and Ana Thirn from Life Sciences Core Facilities
### Study protocol

| Information included in the manuscript? | In which section is the information available? |
|----------------------------------------|---------------------------------------------|
| If study protocol has been pre-registered, provide DOI in the manuscript. | Not Applicable |
| For clinical trials, provide the trial registration number OR the DOI. | Not Applicable |
| Report the clinical trial registration number (at ClinicalTrials.gov or equivalent), where applicable. | Not Applicable |

### Laboratory protocol

| Information included in the manuscript? | In which section is the information available? |
|----------------------------------------|---------------------------------------------|
| Provide DOI or other citation details if external detailed step-by-step protocols are available. | Not Applicable |

### Experimental study design and statistics

| Information included in the manuscript? | In which section is the information available? |
|----------------------------------------|---------------------------------------------|
| Include a statement about sample size estimate even if no statistical methods were used. | Not Applicable |
| Were any steps taken to minimize the effects of subjective bias when allocating animals/sample to treatment (e.g., randomization procedure)? If yes, have they been described? | Not Applicable |
| Include a statement about blinding even if no blinding was done. | Not Applicable |
| Describe inclusion/exclusion criteria if samples or animals were excluded from the analysis. Were the criteria pre-established? | Not Applicable |
| If sample or data points were omitted from analysis, report if this was due to addition or intentional exclusion and provide justification. | Not Applicable |
| For every figure, are statistical tests justified as appropriate? Do the data meet the assumptions of the tests (e.g., normal distribution)? Describe any methods used to assess this. Is there an estimate of variation within each group of data? Is the variance similar between the groups that are being statistically compared? | Not Applicable |

### Sample definition and in-laboratory replication

| Information included in the manuscript? | In which section is the information available? |
|----------------------------------------|---------------------------------------------|
| In the figure legends, state number of times the experiment was replicated in laboratory. | Yes, Figure legends |
| In the figure legends, define whether data description technical or biological replicates. | Yes, Figure legends |

### Ethics

| Information included in the manuscript? | In which section is the information available? |
|----------------------------------------|---------------------------------------------|
| Studies involving human participants: Main details or authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval. | Not Applicable |
| Studies involving human participants: Include a statement confirming that informed consent was obtained from all subjects and that the experiments conformed to the principles set out in the WMA Declaration of Helsinki and the Department of Health and Human Services Belmont Report. | Not Applicable |
| Studies involving human participants: For publication of patient photos, include a statement confirming that consent to publish was obtained. | Not Applicable |
| Studies involving animal experiments: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval. Include a statement of compliance with ethical guidelines. | Not Applicable |
| Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval. Include a statement of compliance with ethical guidelines. | Not Applicable |
| Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study if none were required, explain why. | Not Applicable |

### Dual Use Research of Concern (DURC)

| Information included in the manuscript? | In which section is the information available? |
|----------------------------------------|---------------------------------------------|
| Could your study fall under dual use research restrictions? Please check biosafety documents and list of select agents and toxins (CDC): https://www.selectagents.gov/pdf.htm | Not Applicable |
| If you used a select agent, is the security level of the lab appropriate and reported in the manuscript? | Not Applicable |
| Is a study subject to dual use research of concern regulations, in the name of the authority granting approval and reference number for the regulatory approval provided in the manuscript? | Not Applicable |

### Reporting

The MDCAR framework recommends adoption of discipline-specific guidelines, established and endorsed through community initiatives. Journals have their own policy about requiring specific guidelines and recommendations to complement MDCAR.

### Adherence to community standards

| Information included in the manuscript? | In which section is the information available? |
|----------------------------------------|---------------------------------------------|
| State if relevant guidelines or checklists (e.g., IOUAE, MBBR, ARRIVE, PRISMA) have been followed or provided. | Not Applicable |
| For human marker prognostic studies, we recommend that you follow the REMARK reporting guidelines (see link list at top right). See author guidelines, under Reporting Guidelines. Please confirm you have followed these guidelines. | Not Applicable |
| For phase II and III randomized trials, please refer to the CONSORT flow diagram (see link list at top right) and submit the CONSORT checklist (see link list at top right) with your submission. See author guidelines, under Reporting Guidelines. Please confirm you have submitted this list. | Not Applicable |

### Data Availability

| Information included in the manuscript? | In which section is the information available? |
|----------------------------------------|---------------------------------------------|
| Have primary datasets been deposited according to the journal’s guidelines (see “Data Depositor” section) and the respective accession numbers provided in the Data Availability Section? | Yes, Data Availability |
| Were human clinical and genomic datasets deposited in a public access-controlled repository in accordance to ethical obligations to the patients and to the applicable consent agreement? | Not Applicable |
| Are computational models that are central and integral to a study available without restrictions in a machine-readable form? Were the relevant accession numbers or links provided? | Not Applicable |
| If publicly available data were reused, provide the respective data citations in the reference list. | Not Applicable |
