Non-Spatial and Geospatial Semantic Query of Health Information

With the growing amount of health information and frequent outbreaks of diseases, the retrieval of health information is given more concern. Machine understanding of spatial information can improve the interpretation of health data semantics. Most of the current research focused on the non-spatial semantics of health data, using ontologies and rules. Utilizing the spatial component of health data can assist in the understanding of health phenomena. This research proposes a semantic health information query architecture that allows the incorporation of both non-spatial semantics and geospatial semantics in health information integration and retrieval.

General information
State: Published
Organisations: National Space Institute, Geodesy, Department of Informatics and Mathematical Modeling, Image Analysis and Computer Graphics, University of New Brunswick, National Research Council of Canada
Authors: Gao, S. (Ekstern), Anton, F. (Intern), Mioc, D. (Intern), Boley, H. (Ekstern)
Number of pages: 6
Pages: 167-172
Publication date: 2012
Conference: The XXII Congress of the International Society for Photogrammetry and Remote Sensing, Melbourne, Australia, 25/08/2012 - 25/08/2012
Main Research Area: Technical/natural sciences

Publication information
Journal: International Archives of the Photogrammetry, Remote Sensing and Spatial Information Sciences
Volume: XXXIX-B2
ISSN (Print): 1682-1750
Ratings:
ISI indexed (2013): ISI indexed no
ISI indexed (2012): ISI indexed no
ISI indexed (2011): ISI indexed no
BFI (2008): BFI-level 1
Web of Science (2008): Indexed yes
Original language: English
Public health, Ontologies, Respiratory diseases, RuleML, Geospatical data, Semantic interoperability
Electronic versions:
isprsarchives-XXXIX-B2-167-2012.pdf

Bibliographical note
Since Volume XXXII-3/W14, 1999, the Archives are open access publications, they are published under the Creative Common Attribution 3.0 License, see publications.copernicus.org/for_authors/license_and_copyright.html for details.
