Supplementary Table 2 The List of Excluded Studies in the Secondary Screening.

| Author/Year     | Title                                                                                                                                                                                                 | Reason for exclusion       |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| Qu et al., 2015 | Transcutaneous electrical acupoint stimulation improves outcomes of in vitro fertilization by increasing neuropeptide Y levels: A RCT                                                                 | Duplicate published data  |
|                 | Effect of transcutaneous electrical acupuncture point stimulation on endometrial receptivity in women undergoing frozen-thawed embryo transfer: a single-blind prospective randomized controlled trial   | Duplicate published data  |
| Shuai et al., 2015 | Effects of transcutaneous electrical acupoint stimulation on ovarian reserve of patients with diminished ovarian reserve in IVF-ET Evaluation of “Energy Resonance by Cutaneous Stimulation” Among Women Treated by In Vitro Fertilization | Duplicate published data  |
| Gay et al., 2018 | Transcutaneous electrical acupoint stimulation for pregnancy of in vitro fertilization-embryo transfer                                                                                               | The interventions being studied weren’t TEAS |
| Zhong et al., 2017 |                                                                                                                                                                                                    | Non-RCT                    |
