Abstract: This study aims to reveal the factors and types of grammatical errors are made by students at The Islamic Boarding School of Darul Hijrah. Through this research, educators or education practitioners are expected To make the results of this research as a material to identify and solve problems especially grammar and speaking and as a learning model that can be used, especially for boarding school or madrasah that have similar characteristics or the same as The Islamic Boarding School of Darul Hijrah. This study was conducted in a descriptive using qualitative approach at Madrasah Aliyah of Darul Hijrah Putra Islamic Modern Boarding School Martapura where the eleventh grade students of Madrasah Aliyah Islamic Boarding School of Darul Hijrah Putra are selected as the subject of this research. The data was collected by observation, interview, and documentation. The result of this research are the students were still confused in making the agreement between subject and verb, in differentiating whether to use the definite or indefinite articles, in deciding preposition which preposition should be used, whether to use in, on, or at. Confused in deciding which pronoun should be used to substitute nouns, whether it is personal, relative, possessive, or demonstrative pronouns. The students over generalized the pluralizing of nouns. They just added the -s/ -es without considering that there are some irregular forms of nouns pluralization. The students applied rules in forming past time verb to conjunctions. Some factors caused are he lack of vocabularies and grammar knowledge.

Key words: Grammatical errors, speaking, Islamic modern boarding school

Introduction

Madrasah Aliyah of Darul Hijrah Putra boarding school is Islamic modern boarding school which concerns on Islamic development. This Islamic college gives the students many kinds of activities, like intellectual and spiritual activities. For examples the students are required to study in formal schools. In daily communication the students use like Arabic and
English language. While the spiritual activities the students are required to perform for five daily prayers in congregation. In addition, the students are also given many kinds of religious subjects such as reciting and memorizing holy Quran, studying fiqh, hadith and others.

To master these languages well and improve their abilities this boarding school has an additional program to apply Arabic and English as the medium of their daily conversation beside Indonesia and regional languages. This is the way to mastering foreign languages by doing many practices in the daily activity. Many students come from many ethnics with their different cultural background gather in this place to study and increase their ability. To suitable the activity which they can share the idea, opinion and feeling, they need a certain language or choose the same language as communication.

This study aims to reveal the factors and types of grammatical errors are made by students at The Islamic Boarding School of Darul Hijrah, which is considered as a boarding school not only cultivate daily Arabic as a language but also in English. So with this research, educators or education practitioners are expected To make the results of this research as a material to identify and solve problems especially grammar and speaking and as a learning model that can be used, especially for boarding school or madrasah that have similar characteristics or the same as The Islamic Boarding School of Darul Hijrah. In addition, the results of this research can also be used as a reference for other researchers or other advanced research in developing a better learning in the future.

Research Design

The research is included in qualitative research since it is intended to have grammatical errors in speaking at Madrasah Aliyah of Darul Hijrah Putra Islamic Modern Boarding School Martapura. This study will be conducted in a descriptive using qualitative approach.

This research is designed by using descriptive study in order to describe something appears in the field. The researcher can describe the phenomena appear in grammatical errors in speaking at Madrasah Aliyah of Darul Hijrah Putra.

Data and Data Source

The data of this study were classified into two types. They were linguistics and information. The linguistics data were the language use grammatical errors by the students of Madrasah Aliyah of Darul Hijrah Putra Islamic Modern Boarding School. The category was in the levels of phonemes, phrases, and sentences which were obtained through observation, interview and questionnaire. Secondly, information as data means that the data which are needed are related to the Analysis of Grammatical Errors in Speaking English. They cover the reasons why the students produce them, the number of students of Madrasah Aliyah of Darul Hijrah Putra Islamic Modern Boarding School, and the year when English began to be spoken. Those data were obtained while conducting interview. Especially for the Student, the interview was conducted with the students when English began to be spoken.
Technique of Data Collection

The technique of collecting data is the way the researcher do for collecting data in the research. In this research, the researcher uses some technique in collecting data. Those are observation, interview, and documentation.

The researcher observes want to know and need for gaining the information. In the observation of this study, the researches observe the school condition and speaking activities. So, researcher only observes those areas. Interview is needed by the researcher to clarify about the information which gotten. It is the list of questions that is used to get information needed for the research. Then, they are question that are asked to get information about speaking activities. By combining those methods the researcher can gain the detail information. Documentation is the combining collection of the data. Documentation that is the researchers get from process of observation, interviews, field notes, record and file from institution. In this study, the researcher know of consisting of teaching and learning speaking activities. The next step, the researcher processes the data.

Data Analysis

In analyzing data, the researcher uses qualitative approach. The result or finding data of conducting research will be described according to the phenomena taken from the field and synthesis the result of research.

In this data analysis the researcher analyzes by grammatical errors in speaking at Madrasah Aliyah of Darul Hijrah Putra Islamic Modern Boarding School consisting of the factors and types of grammatical errors are made by students. The result or the finding of conducting research will to describe based on the phenomena taken from the field and synthesis the result of research. The researchers want to find the teaching and learning to improve the student ability in speaking. The conclusion is in the form of description of the object of this study. Finally, in this step the researcher can get the result and conclusion of the research.

Result

Errors in using verb forms

Errors in using verb forms are the most frequent one made by the students. In using verb forms, there are some roles to be obeyed, such as: the form of the sentence whether it is in the active or passive form, and the tense of the sentence. These rules are complex so that the students often make errors in this area. Some of the errors are illustrated as follow:

| NO. | INCORRECT                        | CORRECT                                      |
|-----|----------------------------------|----------------------------------------------|
| 1.  | Yesterday I see she in the class | I saw her in the class yesterday              |
| 2.  | Tomorrow I didn’t enter school   | I will not go to school tomorrow              |
| 3.  | I invite my friend to came my room | I invited my friend to came my room          |
Here the students made errors in producing verb 1 or infinitive. They failed to put the infinitives. They should be in the form infinitives (to+ the simple form of the verb). Although the tense used in past form, but there are still infinitives should be used, the sentences should have been: in number (1) the sentence is “yesterday I see she in the class” this sentence is errors because the word see should be saw number (2) the errors in “tomorrow I didn’t enter school” the correct sentence should be “I will not go to school tomorrow” in number (3) there are the errors put in “I invite my friend to came my room” the actually invite in here must” I invited my friend to came my room” number (4) you couldn’t spoke English very well” the correct sentence should be “you couldn’t speak English very well”.

As the researcher stated above, in spoke usually use past tense since it tells about past experiences. In the sentences below, the students failed to put the verbs in the past form (verb2). The errors were as follows:

| NO. | INCORRECT                      | CORRECT                        |
|-----|--------------------------------|--------------------------------|
| 1   | One for me ketela one          | I bought one casava            |
| 2   | Go to where is                 | Where will you go?             |
| 3   | Is there is the chili          | Is there the chili?            |
| 4   | When your parent visiting you  | When is your parents are see you|
| 5   | I am buy donut one             | I bought one donut             |

In sentences above, the students failed to recognize the past form of the verbs. They still used the simple form of the verbs. This is incorrect since in telling their past experiences should have been number (1) “one for me ketela one” in this sentence is incorrect because for the actually can change with bought so the correct in this sentence is “I bought one casava” in number (2) the structure is wrong because “go to where is” where in here is interrogative if interrogative must put in first sentence the correct is “where will you go?” number (3) this sentence is incorrect because so much is “is there is the chili” the actually is can put just one in first sentence “is there the chili? Number (4) “when your parent visiting you” the sentence correct is “when is your parents see you” in number (5) “I am buy donut one” the sentence correct is “I bought one donut”.

Besides the infinitive forms, verb groups could also be in the forms of irregular verb. In the sentences below, the students failed to put the verbs in the past form (verb2) of irregular. The errors are as follows:
In sentence above the student failed to recognize the past form of the verb. Instead of using the past form, she added the verb with –ed. This is wrong since the verb is the irregular one. He cannot add –ed. He just generalized that the past forms of the verbs are always added by –ed. The sentences should have been in number (1) incorrect because “Andre, you called by Mr. Dwi” the correct is “You are called by Mr. Dwi” in number (2) incorrect same with number one the sentence is “Yesterday you to called by Mr. Cholik” the sentence correct is “Mr. Cholik called you yesterday” in number (3) I taked my cloth in laundry” the correct is “I took my cloth in laundry”.

**Errors in using auxiliary verbs**

The student also failed to recognize the correct form of auxiliary verbs used in their sentences. There are 2 groups here:

1. Do, be and have
2. Modal auxiliaries (can, could, may, might, must, will, ought to, and need).

Modal auxiliaries generally express a speaker’s attitudes or moods. For example, modals can express that a speaker feels something is necessary, advisable, permissible, possible, or probable; and in addition, they can convey the strength of these attitudes. (Betty S azar, 1989:68)

| NO. | INCORRECT                          | CORRECT                             |
|-----|------------------------------------|-------------------------------------|
| 1   | Andre called by Mr. Dwi            | You are called by Mr. Dwi           |
| 2   | Yesterday you to called by Mr. Cholik | Mr. Cholik called you Yesterday   |
| 3   | I taked my cloth in laundry        | I took my cloth in laundry          |

In this sentence incorrect because in number (1) “Her name was Azmi because she good person” the correct is “her name is Azmi because she is good person” so, in number (2) incorrect because don’t can the sentence became couldn’t the example is “My
father *don’t can* come here because his sick” the sentence correct is “My father couldn’t come here because he was sick and now in number (3) incorrect same must there *was* the example is “I am very happy because *can* go home” the sentence correct is “I *was* very happy because I *could* go home.

**Errors in the use pronouns**

Pronoun is used in a place of a noun. It refers to a noun. The main use of pronoun is substitute nouns. The students made error in this area. They are as follow:

| NO. | INCORRECT                        | CORRECT                      |
|-----|----------------------------------|------------------------------|
| 1   | Brother, that is there is egg    | Brother, is there egg?      |
| 2   | Nothing the change               | No change                   |
| 3   | You what happen like that lo    | Why do you act like that?   |
| 4   | One just wes                     | Just one                    |

In this Sentence incorrect in number (1) “Brother, that is there is egg” the correct sentence is ”Brother, is there egg?”. Number (2) ”nothing the change” the correct is “No change” in number (3) “you what happen like that lo” in English forbidden spoke to mix with Indonesian language it is code mixing and the correct is “why do you act like that? Number (4) “one just wes” the sentence correct is “just one” without *wes*.

**Surface Strategy Taxonomy**

Those errors are classified into the types based on surface strategy taxonomy according to dulay. They were omission, addition, misformation and misordering. In order to know which types belong to, it is important to show the wrong sentences.

**Errors of Omission**

Omission errors are characterized by absence of an item that must appear in a well-formed sentence. These errors are indicated by absence of grammatical morphemes in a certain construction. The errors of omission based on the data obtained were found as follow:

| NO | INCORRECT                        | CORRECT                      |
|----|----------------------------------|------------------------------|
| 1  | I prepare my things and my shirts| Finally, I prepared my own things and my shirts |
| 2  | I and my friend visit to other room | Firstly, I and my friend visited to other room |
In sentence (1) and (2), errors of omission occurred in regular past verb is the omission of -ed. Because in number (1) “I prepare my things and my shirts” the sentence correct is “finally, I prepared my own things and my shirts” and number (2) “I and my friend visit to other room” the sentence correct is “firstly, I and my friend visited to other room” While in sentences (3) and (4), an error of omission in simple past tense is the omission of auxiliary verb. Because in number (3) “I very happy” the sentence should be “I was very happy” in number (4) “we very hungry” the sentence should be “we were very hungry” In sentences (5), error of omission occurred in the omission of auxiliaries, example this sentence “there is ice?” This sentence is incorrect because the auxiliary must put first sentence the sentence should be “is there ice?” in sentences (6) the error have “to” the example is “let’s go kitchen” the sentence should be “Let’s go to Kitchen”.

Errors of Addition

Errors of addition are characterized by the presence of an item which must appear in a well-formed sentence. Based on the data obtained were founds as follow:

| NO | INCORRECT                               | CORRECT                              |
|----|----------------------------------------|--------------------------------------|
| 1  | My brother don’t can because his sick | My brother couldn’t follow because he was sick |
| 2  | I couldn’t spokead English very well   | I couldn’t speak English very well    |
| 3  | Last year, I have a holiday for a one week | I spent my holiday for a week, Last year |

The example above showed that in sentences (1) “my brother don’t can because his sick” because the students made errors of addition by applying double marking. The correct is “my brother couldn’t follow because he was sick” in number (2) incorrect because the students made errors of addition by applying double marking the example in sentence “I couldn’t speakad English very well” the correct is “I couldn’t speak English very well” These errors occur when the students give more one marker in their tenses. While in sentence (3), the students made errors of simple addition in which this error occur when one use an item
which should not appear in a well-formed sentence. Last year, I have a holiday for a one week” the correct is “I spent my holiday for a week Last year”

Errors of Misformation

Errors of misformation are characterized by the use of wrong form of the morpheme or structure. This error occur when the students supplies something although it is incorrect. The errors of omission based on the data obtained were found as follow:

| NO | INCORRECT                      | CORRECT                        |
|----|--------------------------------|--------------------------------|
| 1  | The children reading holly Qur’an | The Children are reading holly Qur’an |
| 2  | I take after this              | I took after this              |
| 3  | One for me ketela one         | I bought one cassava           |

The example above showed that in sentences (1) “the children reading holly Qur’an” the correct is “the Children are reading holly Qur’an” because the students made errors in the type regularization, in which a regular marker is used in place of an irregular one, as children to be childs so, in sentences (2) take became took the example is “I take after this” the correct is “I took after this” . While in sentence (3), the student made error in the type of archi form, in which they selected one member of the class of personal pronouns to function for several others in the class, as me for me the example is “one for me ketela one” the correct is “I bought one casava”

Errors of Misordering

Misordering error is characterized by incorrect placement of a morpheme or group of morphemes in an utterance. The examples were as follow:

| NO | INCORRECT                      | CORRECT                        |
|----|--------------------------------|--------------------------------|
| 1  | In canteen we bought some foods | We buy some foods in canteen   |
| 2  | In there, Dana bought clothes and shoes | Dana bought some clothes and shoes there |
| 3  | One for me ketela one         | I bought one cassava           |

The examples above showed that in sentences (1) “in canteen we bought some foods” the sentence correct is “we buy some foods in canteen” and (2) “in there, Dana bought clothes and shoes” the sentence correct is “Dana bought some clothes and shoes there” because the students made errors by incorrect placement of adverb of place. Those adverbs should be
placed in the end of sentence. While in sentence (3) “one for me ketela one” the sentence correct is “I bought one casava”

The Causes of Error

In the process of second language learning, the learners may use any strategies in order to get comprehensive in the target language. During the process of second language learning, every learner always produces any errors or mistakes. Based on the description of findings above, the researcher notes that most of the students made errors in their speaking. Mostly, the students made errors in using verb form and omission. A student supposed that the target language and his language were similar so he made errors. There were many students think that speaking was something terrible. They were often confused what and how to speak using grammar in good.

The learner’s error may be caused by many factors. English was foreign for students. And this is one of the possible causes of their errors. The students error in using English tense made by bilinguals is caused by their they first think in their mother tongue or native language first, and then they translate into English when they were speaking in English. Indonesia language did not have verb conjugation and in expressing idea, whether something happens at present, past and future. In Indonesian language is only expressed by adverb of time such as sekarang, besok, kemarin and sedang. The verbal form does not change although the adverb of time changes in other words; there are no tenses in Indonesia language.

Besides, they did not understand about grammar, although the teacher had taught it. Besides, the materials of the student’s English lesson were mostly taken from the kinds of the text, and grammar an addition only. They never tried to use grammar both in speaking and it is also the vocabularies that students have still poor or lack.

The other causes of student’s errors are based on how to recognize the part of speech. They still have difficulties to understand and use the functions part of speech. In this case they cannot arrange or make their own sentences well.

In these cases, the writer has several examples and described below. The students produced two items rather than one were marked for the same tense i.e. they added double marking of verb “did” and “brought” in sentences “I did not brought food”. They had over-generalized of verb 2 in constructing the past sentence.

The student did not know the rule. The students failed to apply the rules correctly. For example: “in there we enjoyed with my friend” the students added “in” on “in there” in which it should be unnecessarily. The sentence should have been “we enjoyed with my friend” another example “after that we tired”, the student omitted to be (were) in their sentence. It should have been “we were tired”. In the following example: “we return home with safe”. The errors in this sentence, some students omitted –ed in their past tense. The sentences should have been “we returned home safely. Another example: “I very happy” and “we very happy”. From both of sentences, the students omitted be of “was” and “were”. The examples above showed that the students tented to elicit the sentences and used incomplete past rule. The
sentences were incorrect since the existence of past verb or past marker indicate that the sentence the student made was in past time.

The students misunderstood the rule. As in the following example: “we were returned home”, this sentence was past, but the form was passive the student error was he added “were” in active past. The sentences should have been: “we returned home”. Another example: “I was so tired but I was very happy” there was the confusion of so and very. The sentence should have been: “I was very tired but I was happy”

Conclusion

This research can be concluded that there are many grammatical errors analysis in speaking English by the eleventh grade students of Madrasah Aliyah of Islamic Modern Boarding School of Darul Hijrah Putra. The students were still confused in making the agreement between subject and verb. It could be because in Bahasa Indonesia there is no agreement between subject and verb. The students were still confused in differentiating whether to use the definite or indefinite articles. It could be because in Indonesian language grammar there is no definite article used. The students still confused in deciding preposition which preposition should be used, whether to use in, on, or at. The students over generalized the pluralizing of nouns. They just added the -s/ -es without considering that there are some irregular forms of nouns pluralization. The students still confused in deciding which pronoun should be used to substitute nouns, whether it is personal, relative, possessive, or demonstrative pronouns. The students applied rules in forming past time verb to conjunctions.

There are some factors which cause the existences of grammatical errors analysis in speaking English by the eleventh grade students of Madrasah Aliyah of Islamic Modern Boarding School of Darul Hijrah Putra seen from, the lack of vocabularies and grammar knowledge which are experienced at Islamic Modern Boarding School Darul Hijrah which shows that the existence of grammatical errors analysis in speaking English by the eleventh grade students of Madrasah Aliyah of Islamic Modern Boarding School of Darul Hijrah Putra.
