(Europhys. Lett., 60 (2), pp. 234–240 (2002))

PACS. 62.20.Fe – Deformation and plasticity (including yield, ductility, and superplasticity).
PACS. 05.45.Ac – Low-dimensional chaos.
PACS. 05.45.Df – Fractals.

Due to an error in the printing procedure, fig. 3b in the printed version on p. 238 does not contain the experimental points (plotted by the authors as filled circles).
The .pdf version though is correct, as one can see from the online version.
We publish herewith fig. 3, apologizing to the authors on behalf of the printer.

Fig. 3 – (a) The largest Lyapunov exponent of the model. (b) Distributions of the stress drops from the model (○), from experiments (●) and Δρm (♦) from the model. The solid lines are guides to the eye.
