**Supplementary Table 3: Causes and Outcomes of Ischemic Complications (acute and delayed)**

| Patient # | Cause of Ischemic complication                     | Stent Coating             | mRS at Discharge | mRS > 90 days |
|-----------|-----------------------------------------------------|----------------------------|------------------|---------------|
| 1         | FD-related                                          | low thrombogenicity coated | 4                | 1             |
| 3         | FD-related (delayed on day 43)                      | low thrombogenicity coated | 0                | 1             |
| 7         | FD-related and Delayed cerebral ischemia           | not coated                 | 1                | 1             |
| 9         | FD-related                                          | not coated                 | 6                | 6             |
| 10        | FD-related                                          | not coated                 | 5                | 2             |
| 12        | Delayed cerebral ischemia                           | not coated                 | 6                | 6             |
