Message from the Guest Editor

Dear Colleagues,

Businesses based around additive manufacturing have experienced double-digit growth in recent years. Accordingly, we have witnessed huge efforts in material and equipment development, which have opened up new application possibilities not previously in existence. However, it can be seen that increasingly more development efforts are needed, not only in addressing hardware but also concerning the modeling of materials and designs, topology optimization, process simulation and optimization, data processing, and total process flow for AM parts.

The objective of this Special Issue is to provide a forum for researchers and practitioners to exchange their latest achievements and to identify critical issues and challenges for future investigations on “Modeling, Simulation and Data Processing for Additive Manufacturing”.

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-four topics: biomaterials, energy materials, advanced composites, structure analysis and characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, general. Materials provides a unique opportunity to contribute high quality articles and to take advantage of its readership.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q1 (Metallurgy & Metallurgical Engineering) / CiteScore - Q2 (Condensed Matter Physics)
