Literature review

The Elizabethan era began in 1558 when Elizabeth-first became queen. She was one of the most famous monarchs in English history. This era has reminisced for its richness of drama and poetry. This era ended in 1603.

Elizabeth one was a Protestant. She re-established the Church of England by means of the formal church in England. Everyone had to join their home-grown church and there were laws about the kind of religious facilities and the prayers which could be said, but Elizabeth did not inquire about people’s actual beliefs. She flourished in getting stability between the opinions of Catholics and the more extreme Protestants. In this manner, she shunned any serious religious conflict in England. Elizabeth turned out to be one of the most famous royals in English history, chiefly after 1588, when the English overpowered the Spanish
Armada, which had been sent by Spain to reestablish Catholicism and defeat England. There are a lot of writers of this age but the researcher mentioned well-known of them such as:

The Elizabethan Age has seen so exceedingly because of the contrasts with the eras before and after. It was a brief era of mostly internal peace between the English Reformation, with battles among Protestants and Catholics, and the fights amongst parliament and the monarchy that would engulf the seventeenth century. The protestant-catholic divide was established, for a time, by the Elizabethan Religious Settlement and parliament were still not tough enough to challenge royal absolutism.

Throughout the Elizabethan age, English literature has changed from a shell into a delightful being with imagination, creativeness, and boundless stories. It was not about mystery or miracle plays and the poetry was not nearby religion and the principles addressed in the Church. the influence of personal beliefs or feelings, rather than facts increased and examining various features of life increased with the embellishment of plentiful authors. L. Arbaoui (2012) mentioned that Elizabethan literature placed a great basis for English literature and influenced hundreds and thousands of writers of the following literary eras. It is for this purpose, the Elizabethan period is known as the wonderful age of English literature.

The best of the Elizabethans, Sidney was effective in more than one genre of literature, but no one of his literary was published until after his passing away. His greatest achievement was his linked sequence of 108 love sonnets. These sonnets which be indebted much to Ronsard
and Petrarch in style and tone, place Sidney as the supreme Elizabethan sonneteer excluding Shakespeare. Written to his mistress, Lady Penelope Rich, though dedicated to his wife, they disclose real lyric feeling expressed in a language delicately archaic. In form Sidney typically adopts the Petrarchan octave (ABBAABABA), with differences in the sestet which contain the English final couplet (a couple of successive lines of verse, usually rhyming and of the similar length).

There was no given reason for it, however, it was supposed to be associated with claims of blasphemy a manuscript supposed to have been written by Marlowe was said to encompass "vile heretical conceipts". On 20 May, he was carried to the court to be present upon the Privy Council for questioning. There is no record of their having met that day and he was ordered to be present upon them each day afterwards until "licensed to the contrary".
