### Supplementary material

*Table S1 Clinicopathologic information of the HGS-OvCa patients*

| Number    | 100 |
|-----------|-----|
| Age       | 58  |
| Stage     |     |
| I         | 9   |
| II        | 17  |
| III       | 65  |
| IV        | 9   |
| Tumor grade |     |
| G2        | 48  |
| G3        | 52  |
| Surgical  |     |
| optimal   | 55  |
| suboptimal| 45  |
| Vital status |    |
| living    | 52  |
| deceased  | 48  |
| Follow up |     |
| median (range) | 25 (1-79) |
Figure S1. Relative levels of miR-506 in several ovarian cancer cell lines. The level of miR-506 in HeyA8 was taken as 1.
