Supplementary Figure S6. No effect of S100A10 knockdown on the growth of xenograft tumor in vivo. MDA-MB-231 cells (A) and PDX-KUB06 cells (B) constitutively expressing S100A10 shRNA or negative control were injected at the mammary fat pad region of NSG mouse. Tumor volume was measured once a week. Data were presented as mean±S.D, n=3.
