(Molecular Therapy: Nucleic Acids 21, 804–813; September 2020)

In the originally published version of this article, the authors have discovered an error in Figure 1J. The authors performed preliminary FISH experiments using control probes targeting additional lncRNAs that have been validated in breast cancer cells by previous studies. Images from these experiments were inadvertently included in Figure 1J. The corrected Figure 1 appears below. This correction does not change the conclusion of the paper. The authors regret this error and apologize for any confusion. This error has been changed online.
