Effectiveness and safety of follitropin alfa for ovarian stimulation using a GnRH antagonist protocol in real-world clinical practice: a multicenter, prospective, open, non-interventional assisted reproductive technology study

Peter Sydow, Norbert Gmeinwieser, Katrin Pribbernow, Christoph Keck, Inka Wiegratz

Additional File 2. Patient disposition.

Patients screened (n=507)

Patients excluded (n=44)
- No signed informed consent (n=1)
- No application of Ovaleap® (n=5)
- Missing documentation (n=3)
- Site excluded from all analysis (n=35)

Total treated population (n=463)
- No embryo transfer (n=64)
- Embryo transfer (n=399)

Patients with protocol deviations (n=24)
- Ovaleap® application not documented, but confirmed (n=1)
- No oocyte retrieval due to non-medical reasons (n=2)
- Not fulfilling inclusion or exclusion criteria (n=21)

Per protocol population (n=439)
- No embryo transfer (n=56)
- Embryo transfer (n=383)
