Supplemental Fig. 1

A

Supplemental Fig. 1 A: Bar graph showing TEER (Ωcm²) values for WT, Delta, and Omicron strains of SARS-CoV-2 with or without enoxaparin treatment. The x-axis represents the enoxaparin treatment (− or +), and the y-axis shows TEER values.

B

Supplemental Fig. 1 B: Bar graph showing SARS-CoV-2 infection Copies/mL for WT, Delta, and Omicron strains with or without enoxaparin treatment. The x-axis represents the enoxaparin treatment (− or +), and the y-axis shows the number of copies/mL.

C

Supplemental Fig. 1 C: Bar graph showing SARS-CoV-2 infection Copies/mL in a 3D model of normal human bronchial epithelial (NHBE) cells with enoxaparin treatment at different time points (0.5 h, 4 h, 16 h, 24 h). The x-axis represents the enoxaparin treatment time points, and the y-axis shows the number of copies/mL.
