Figure S1. Concentration-time profile of oxybate following oral administration of LXB and SXB in Study 2a

LXB, lower-sodium oxybate; SXB, sodium oxybate.

aTreatments were F: LXB 4.5 g fasted, 60 mL water; G: SXB 4.5 fasted, 60 mL water; H: LXB 4.5 g fed, 60 mL water; I: SXB 4.5 g fed, 60 mL water. Treatments administered in a total volume of 240 mL water (treatments J and K) are not shown.
