| Title                                                                 | Authors                                                                 | Page |
|---------------------------------------------------------------------|------------------------------------------------------------------------|------|
| A No-Network Matched High Gain Vertical Array Antenna for VHF Band Applications | Wenjun Zhu and Li-Xin Guo                                                | 1    |
| Development of a Low-Profile Broadband Cavity Backed Bow-Tie Shaped Slot Antenna in SIW Technology | Bollavathi Lokeshwar, Dorai Venkatasekhar, and Jammalamadugu Ravindranadh | 9    |
| A Compact and Narrowband Displaced Substrate Integrated E-Plane Waveguide (SIEW) Junctions Filter | Danyang Huang, Xuan Hui Wu, and Qun Zhang                               | 19   |
| Broadband Surface-Mount Dipole Antenna Array Using Highly Isolated Via Fence for 5G Millimeter-Wave Applications | Xiubo Liu, Wei Zhang, Dongning Hao, and Yanyan Liu                     | 27   |
| 6-Meter Beam Waveguide Antenna for Ground Based Terahertz Telescope  | Vijay K. Singh, Yogesh Tyagi, Pratik Mevada, Soumyabrata B. Chakrabarty and Milind B. Mahajan | 35   |
| One-Step Absolutely Stable FDTD Methods for Electromagnetic Simulation | Faxiang Chen and Kang Li                                               | 45   |
| Application of High-Frequency Dielectric Logging Technology for Shale Oil Production | Chen Li, Shaogui Deng, Zhiqiang Li, Yiren Fan, Jingjing Zhang, and Jutao Yang | 53   |
| Numerical Assessment of Red Palm Weevil Detection Mechanism in Palm Trees Using CSRR Microwave Sensors | Mohammed M. Bait-Suwailam                                               | 63   |
| Low-Cost and Small Size Millimeter Wave (24 GHz) Extended Hemispherical Lens Antenna for Automotive and Industrial Applications Using FR408HR Substrate | Waleed Ahmad, Furkan Dayi, Hamoodur Rehman, and Wasif Tanveer Khan       | 73   |
| Synthesis of a Dual-Band Flat-Top Pattern Using Polarization Dependent Metasurface | Pallapati Vinod Kumar and Basudeb Ghosh                                 | 81   |
| Terahertz Off-Axis Focus Polarization Converter Based on Metasurface  | Bo Yin, Zhu Xu, and Yue Ma                                              | 91   |
| A Compact Dual-Band Wideband Circularly Polarized Microstrip Antenna for Sub-6G Application | Zhong Yu, Leiyuan Huang, Qi Gao, and Bingwen He                         | 99   |
| High Gain and Wide Bandwidth Array Antenna for Sector Beam Pattern Synthesis | Ayyadevara M. V. N. Maruti and Bhavanam S. N. Kishore                  | 109  |
Wideband MIMO Antenna with Compact Decoupling Structure for 5G Wireless Communication Applications
Mohammed M. Bait-Suwailam, Thamer Almoneef, and Saud M. Saeed ........................................ 117

A Low-Profile Wideband BPF for Ku Band Applications
Ambati Navya, Govardhani Immadi, and Madhavareddy Venkata Narayana ............................. 127

Broadband Surface-Mount Differential-Fed Dipole Antenna and Its Array for 5G Millimeter-Wave Applications
Xiubo Liu, Wei Zhang, Dongning Hao, and Yanyan Liu ............................................................ 137

Design and Fabrication of a Liquid Crystal-Based 94 GHz 360° Phase Shifter for Reflectarray Antennas
Rongxin Mao, Junjie Xu, Xianping Li, Shuangyuan Sun, Xiangxiang Li, Jun Yang, Zhiping Yin Guangsheng Deng and Hongbo Lu ................................................................. 145

Miniaturized Broadband Quadrature Hybrid Coupler with Phase Shifter
Soheyl Soodmand, Mark A. Beach, and Kevin A. Morris ............................................................ 151

Highly Flexible Uniplanar Dual-Band Power Divider for Arbitrary Source and Load Impedances
Rahul Gupta, Maher Assaad, and Mohammad Hashmi ............................................................... 159

Near Field RFID Tag for IoT in Sub-Six GHz Band
Walaa M. Hassan, Tamer M. Ali, and Ahmed M. Attiya ............................................................. 169
