## Supplementary Table 1. CT Acquisition Protocol and Radiation Dose

| CT acquisition protocol                                      |       |
|--------------------------------------------------------------|-------|
| Prospective scan                                            | 6 (0.6) |
| Retrospective ECG-gated spiral scan (R-R window 60–80%)     | 425 (40.5) |
| Retrospective ECG-gated spiral scan (R-R window 30–80%)     | 546 (52.0) |
| Retrospective ECG-gated spiral scan (R-R window 0–90%)      | 73 (7.0) |

| Dose length parameter (mGy·cm)                             | 667.2 ± 414.0 |
| Effective dose (mSv)                                       | 9.3 ± 5.8     |
