Flow Diagram

Enrollment

Patients with age over 70 and receiving intranasal dexmedetomidine postoperatively after orthopedic surgery between October 2019 and October 2020 (n=65)

Excluded (n=42)
- Vital parameters not recorded hourly (n=26)
- Concomitant sedative medication (n=11)
- Vasoactive treatment (n=5)

Analysis

Analysed (n=23)
