Supporting Figure S1. Boxplots of \(\text{AUC}_{0-t}\) for (A) ethinyl estradiol, (B) levonorgestrel, and (C) GSK3640254 categorized by ALT levels for each participant. The top, middle, and bottom box lines represent the upper quartile, median, and lower quartile, respectively. The top and bottom whiskers represent maximum and minimum values, respectively. ALT, alanine aminotransferase; \(\text{AUC}_{0-t}\), area under the plasma concentration-time curve from time zero to the end of the dosing interval at steady state; ULN, upper limit of normal.
