The Role And Importance Of Hotel Industry In The Development Of The National Economy Of Uzbekistan

Rakhimov Hasan Abdusaidovich
PhD, Teacher Of The Department Of Economic Analysis And Statistics, Samarkand Institute Of Economics And Service, Uzbekistan

ABSTRACT

This article describes the conceptual directions of improving the quality of service in hotels and scientific-theoretical and methodological issues of its evaluation. It shows the factors affecting the quality of hotel services, the specifics of hotel services, the system of indicators that reflect the quality of service in hotels, the content and ways to determine them.

KEYWORDS

Hotel, service, quality, quality of service, quality of service in hotels, system of indicators of quality of service in hotels

INTRODUCTION

The focus on the formation and development of tourism in Uzbekistan began mainly after the independence of our country. To date, the development of tourism and hotel services directly related to it in our country has risen to the level of public policy as a priority of economic development. Necessary organizational, legal and economic mechanisms for the development of tourism have been created, the relevant normative and legal documents have been adopted by our government, and work in this direction is still ongoing. In this regard, the laws of the Republic of Uzbekistan, many decrees and resolutions of the President of the Republic of Uzbekistan, resolutions of the Cabinet of

Ministers have been adopted and are being implemented.

Implement comprehensive measures to fully utilize the potential of tourism, accelerate the development of foreign and domestic tourism, ensure economic growth and improve the quality of services in accordance with international standards and increase the share of tourism in economic growth. In order to ensure the implementation of Resolution PF-4058 "On measures to support enterprises, ensure their sustainable operation and increase export potential", the Cabinet of Ministers of the Republic of Uzbekistan on January 30, 2009 approved the resolution of the Ministry of Foreign Economic Relations and Trade. Approved the proposal to establish an Interdepartmental Coordination Council for Support and Development of Tourism1.

This decision of the Cabinet of Ministers of the Republic of Uzbekistan has launched a new stage in the sustainable development of tourism in the Republic and in all regions. Because tourism was developing mainly in central, industrialized cities. Its development in different regions directly requires the development of the hotel network.

According to the data, 76.2% of the total tourist flow in Uzbekistan falls on the cities of Samarkand, Bukhara, Tashkent and Khiva, 24.6% of foreign tourists are interested in the Fergana oasis. 40% of the tourist potential is in Tashkent city and Tashkent region, 37% in Samarkand, Bukhara and Khorezm regions, 16% in Fergana oasis and Surkhandarya region. The remaining provinces, which occupy 50% of the territory, account for only 7% of tourism potential2.

This situation, as noted, requires the construction of modern hotels in all regions. But in some areas the share of tourism is very low. In particular, according to Uzbektourism, the share of licensed tourism organizations in Jizzakh region at the beginning of 2012 was only 0.38%. Of these, 0.41% are tourism organizations and 0.34% are hotels.

Due to the unprecedented development of tourism, on the instructions of the Cabinet of Ministers of the Republic of Uzbekistan, a working group on tourism development was established in each regional administration. The organization has developed regional programs for the development of tourism in each region. However, the issues of comprehensive use of tourist potential, the formation of tourism infrastructure and its provision with hotels in our country have not been sufficiently studied. As a result, there are still significant inequalities in the development of tourism and its hotels in the regions. In this regard, on May 10, 2012, the President of the Republic of Uzbekistan adopted a resolution "On the Program of development of the service sector in the Republic of Uzbekistan for 2012-2016." Along with all services, special attention is paid to the development of tourism and hotel services. However, a number of opportunities for the development of this sector remain untapped. Theoretical substantiation of these cases and the development of practical proposals testify to the urgency of this topic. This objective necessity was also the basis for our choice of this topic.

In the priorities for 2012, the President of our country stated that "... the next important task that requires special attention is to ensure the rapid development of the service sector ...").3

order to achieve this, on May 10, 2012, the President of the Republic of Uzbekistan I.A. Karimov adopted a resolution "On the Program of development of the service sector in the Republic of Uzbekistan for 2012-2016." The resolution envisages increasing the share of the service sector in the country’s GDP to 55% by 2016.

According to the approved program, tourism services, including hotel services, are expected to increase 2.3 times in 2016 compared to 2012.

It is obvious that tourism services, including hotel services, are expected to grow rapidly. This situation requires an in-depth study of the field not only theoretically but also practically. In this regard, the topic of the dissertation corresponds to the areas of research aimed at the development of tourism as an integral part of the service sector as an integral part of the service and the hotel industry, which is a key factor in its development.

The tourism industry and its structure, the hotel industry, is an important sector of the economy. This sector has entered its stage of rapid development in our country in the XXI century. Due to this, many scientists are studying this field in our country. The essence, traditions and strategy of organization of ecotourism in Uzbekistan, which is an integral part of tourism, the results of the first important analysis of the model of national tourism development in Uzbekistan, and strategy of organization of ecotourism in Uzbekistan, which is an integral part of tourism, the results of the first important analysis of the model of national tourism development in Uzbekistan.

4 Resolution of the President of the Republic of Uzbekistan dated May 10, 2012 No PP-1754 "On the Program of development of the service sector in the Republic of Uzbekistan for 2012-2016".

In the context of modernization of the country's economy, the role of hotels in the modernization of the economy, the types of services they provide, their improved definitions have been developed. It theoretically analyzed the views of various scholars on the role of hotel industry in the development of the national economy and tourism of Uzbekistan, the content of services provided in them, and revealed their specific features.

1. The role of hotels in the modernization of the economy, the types of services they provide, their improved definitions have been developed. It theoretically analyzed the views of various scholars on the role of hotel industry in the development of the national economy and tourism of Uzbekistan, the content of services provided in them, and revealed their specific features.

2. The system of factors influencing the formation, development and efficiency of the hotel industry and their specific features are described. It is based on the formation and development of hotel industries in the country in connection with the tourism industry, ways of their balanced development, the role of hotel services in the structure of tourism services and improving their efficiency.

3. A system of indicators representing the efficiency of hotel management, ways of their classification, identification and analysis has been developed. It reveals the specific features.

Now there is a need to study the economic, geographical, natural, regional aspects of the development of tourism in the country in accordance with tourism. But there is very little scientific research in this area. Uzbek experts in the field of tourism were among the first to argue that the geography of tourism and the development of regional tourism is a promising direction. Preliminary research in this area has shown that in the sustainable development of tourism in the region, all the tourist resources of the region and hotels for tourists play a key, decisive role.

It should be noted that preliminary research on the study of tourist resources in Jizzakh region has also been published. These scientific data provide only general recommendations on the use of tourist resources in Jizzakh region. However, the development of the hotel system has been neglected. All this requires a study of the development of tourism in the region and the hotel industry, which is a key factor in its development.
