SUPPLEMENTARY FILE 2

B. Suggested time to return to driving after carpal tunnel release that could be included as part of general patient information
Newington et al. (2022). Driving, work, wound care and rehabilitation after carpal tunnel release: Consensus recommendations from a UK Delphi study

SUPPLEMENTARY FILE 2
C. Work-related advice for inclusion in general return to work recommendations after carpal tunnel release

| Suggested work-related advice provide by participants in round 1 | All (n=30 (%)) | Surgeons (n=20 (%)) | Therapists (n=10 (%)) |
|---------------------------------------------------------------|---------------|---------------------|-----------------------|
| Once the wound is healed, can do tasks within pain/comfort limits | 29 (97)       | 19 (95)             | 10 (100)              |
| Aim to pace and modify tasks when returning to work          | 30 (100)      | 20 (100)            | 10 (100)              |
| Discuss with manager (and occupational health) in advance and plan a phased return to work | 25 (83)       | 16 (80)             | 9 (90)                |
| Depends on the risk to others                                | 15 (50)       | 12 (60)             | 3 (30)                |
| Should be encouraged to return to work as soon as possible    | 13 (43)       | 9 (45)              | 4 (40)                |
| **The individual is best placed to decide whether they will be able to do their job** | **23 (77)**   | **17 (85)**         | **6 (60)**            |
| Work from home initially, if possible                        | 4 (13)        | 4 (20)              | 0                     |
| Safety comes first, loss of earnings should not influence return to work | 11 (37)       | 9 (45)              | 2 (20)                |
| Each patient will need to make a decision in discussion with their healthcare professional | 22 (73)       | 13 (65)             | 9 (90)                |

Participants were asked whether each piece of advice should be included in general return to work recommendations for carpal tunnel release patients. Responses show the number and percentage agreeing that the advice should be included. Bold responses indicate that the 75% consensus level was met.
D. Recommendations for wound care and hand use after carpal tunnel release

| Round 1 | All n=30 (%) | Surgeons n=18 (%) | Therapists n=12 (%) | Round 2 | All n=30 (%) | Surgeons n=20 (%) | Therapists n=10 (%) |
|---------|--------------|-------------------|---------------------|---------|--------------|-------------------|---------------------|
| Use of bulky dressings | | | | | | | |
| None or remove after 2-3 days | 19 (63) | 12 (67) | 7 (58) | Remove any bulky dressing after 2-3 days, unless otherwise advised | 1 (3) | 1 (5) | 0 |
| Remove after 1 week | 7 (23) | 3 (17) | 4 (33) | No | 29 (97) | 19 (95) | 0 |
| Remove after 10-14 days | 0 | 0 | 1 (8) | Yes | | | |
| Keep on until review | 4 (13) | 3 (17) | | | | | |
| Washing the wound | | | | | | | |
| Wash within 2-3 days | 2 (7) | 2 (11) | 0 | Keep wound dry for 10-14 days, unless otherwise advised | 3 (10) | 3 (15) | 0 |
| Wash after 1 week | 4 (13) | 1 (6) | 3 (25) | No | 27 (90) | 17 (85) | 0 |
| Avoid getting wet for 10-14 days | 14 (47) | 10 (56) | 4 (33) | Yes | | | |
| Keep dry until review | 9 (30) | 4 (22) | 5 (42) | | | | |
| Other | 1 (3) | 1 (6) | 0 | | | | |
| Using the hand for daily function | | | | | | | |
| Day after surgery, as able | 17 (57) | 11 (61) | 6 (50) | Use the hand as soon as possible, ideally within 1-2 days of surgery, unless advised otherwise | 2 (7) | 1 (5) | 1 (10) |
| 1-2 days after surgery, as able | 12 (40) | 7 (39) | 5 (42) | No | 28 (93) | 19 (95) | 9 (90) |
| 1 week after surgery, as able | 1 (33) | 0 | 1 (8) | Yes | | | |
| Do not use hand until review | - | - | - | | | | |

Bold responses indicate where the 75% consensus level was met.

SUPPLEMENTARY FILE 2

E. Recommendation regarding scar care and post-operative complications

|                          | All n=30 (%) | Surgeons n=18 (%) | Therapists n=12 (%) |
|--------------------------|--------------|-------------------|---------------------|
| Scar massage             |              |                   |                     |
| Massage scar over dressing | 1 (3)        | 0                 | 1 (8)               |
| Massage scar once wound closed and sutures removed | 28 (93) | 17 (94) | 11 (92) |
| Not to massage the scar  | 1 (3)        | 1 (6)             | 0                   |
| Possibility of pillar pain|              |                   |                     |
| Yes                      | 28 (93)      | 17 (94)           | 11 (92)             |
| No                       | 2 (7)        | 1 (6)             | 1 (8)               |
| Possibility of scar sensitivity|          |                   |                     |
| Yes                      | 30 (100)     | 18 (100)          | 12 (100)            |
| No                       | 0            | 0                 | 0                   |
| Possibility of ongoing symptoms|         |                   |                     |
| Yes                      | 30 (100)     | 18 (100)          | 12 (100)            |
| No                       | 0            | 0                 | 0                   |

All items relate to Delphi round 1. Bold responses indicate that the 75% consensus level was met.
F. Response to Delphi questions about hand and wrist exercises after carpal tunnel release

| Delphi round 1                      | All n=30 (%) | Surgeons n=18 (%) | Therapists n=12 (%) | Delphi round 2                      | All n=30 (%) | Surgeons n=20 (%) | Therapists n=10 (%) |
|------------------------------------|--------------|-------------------|---------------------|------------------------------------|--------------|-------------------|---------------------|---------------------|
| Median nerve gliding exercises     |              |                   |                     | Recommend median nerve gliding after surgery |              |                   |                     |
| **After surgery**                  | 8 (27)       | 5 (28)            | 3 (25)              | **No**                             | 10 (33)      | 8 (40)            | 2 (20)              |
| **Before and after surgery**       | 8 (27)       | 1 (6)             | 7 (58)              | **Yes**                            | 20 (67)      | 12 (60)           | 8 (80)              |
| **None**                           | 8 (27)       | 8 (44)            | -                   |                                    |              |                   |                     |
