Among versatile administrator bunches internationally, Vodafone positioned fifth by income and second (behind China Mobile) in the number of associations (469.7 million) starting at 2016 [10].

7. **ENVIRONMENTAL STRATEGY**

Saving carbon by reducing travel intensity: In fiscal 2016, our efforts to invest in virtual collaboration technology along with strategic shifts in our delivery model by maximizing use of our Global Delivery Network reduced our air travel carbon emissions per employee by more than 10 percent from fiscal 2015. Thanks to the widespread use of collaboration technologies, continuing operational rigor in their delivery model, and an increased focus on virtual and regionalized training, they avoided more than 40,000 metric tons of CO2, saved more than US$150 million in travel costs for Accenture and their clients, and improved work-life balance for their people around the world.

More efficient lighting and cooling: Accenture has identified enormous potential to make a difference in environmental sustainability by maximizing the use of new and digital technologies in our day-to-day operations. Frankfurt innovates with a smart LED hub For example, in fiscal 2016, Accenture installed a cutting-edge lighting system in their Campus Kronberg office in Frankfurt, Germany. The lighting system covers six floors, uses custom-manufactured LED ceiling-suspended luminaires, and is powered and controlled using Power over Ethernet (PoE). This eliminated the need for a traditional wiring installation and instead uses plug-and-play Ethernet cabling to power, control and relay information to the system’s controllers.

Adding sensors to the system turned it into a smart LED hub where each luminaire collects information on ambient lighting, humidity, temperature and occupancy, and communicates it back to the central hub. Its flexible automated control also has eliminated the need for light switches. The system switches on and adjusts the lighting if someone occupies a space, and does the reverse when they leave.

Core hour and set-back programs ensure that the system operates at its most-efficient levels, and the daylight harvesting capability built into all the luminaires makes the most of daylight hours by
adjusting intensity. The combined effect of LED, PoE and smart hub technology has helped reduce carbon emissions and increased energy efficiency.

8. HR STRATEGIES

Accenture team collaborates or unites or combines with its customers spread all over the world to set up and coordinated projects to:

- Create an HR methodology that is firmly coordinated with both the business system and the human capital technique to help business results while conveying high-esteem ability and HR benefits that drive an enhanced worker and supervisor encounter.
- Design and execute an HR working model fit for conveying ability and HR benefits proficiently and adequately on a worldwide scale to help the basic needs of the business.
- Drive driving practices and operational greatness crosswise over ability and HR forms by adjusting those procedures to the HR working model and the hidden HR innovation design.

A coordinated HR methodology, a worldwide HR working model, and steady procedures can change HR into a finely tuned and deft association equipped for driving new levels of business esteem. Accenture is a pioneer and thought pioneer in the HR space. The wide-achieving research activity, "The Future of HR," has distinguished a few key attributes the HR work must create to enhance its effect on the business:

- Find intermediary new wellsprings of ability.
- Assemble a versatile and engaged culture.
- Apply science and actuality based investigation.
- Build up a learning association.
- Reclassify employments and profession ways to encourage inner and outer labourer versatility.

At last, Accenture can enhance their customer's HR capacities and their capacity to convey unsurprising, great HR administrations and at the same Accenture causes the HR associations to improve as a key cooperate with the business.

9. COMPETITORS

**IBM:** The International Business Machines Corporation (IBM) is an American multinational innovation technology-based organization headquartered in Armonk, New York, United States, with its branches spread in more than 170 nations. The organization started in 1911 as the Computing-Tabulating-Recording Company (CTR) and was renamed "Worldwide Business Machines" in 1924. IBM produces and markets PC equipment, middleware, and programming, and gives facilitating and Consulting or consultation administrations in regions going from centralized server PCs to nanotechnology. Accenture is principally a frameworks combination, Consulting and outsourcing organization. IBM Services gives a substantially more extensive scope of administrations. That is, the examination isn't exactly one type to its logical counterpart. In any case, Accenture is the nearest "peer" to IBM's Services business [9].

**Capgemini Consulting:** Capgemini is a French multinational expert administration and business Consulting organization headquartered in Paris, France. It gives IT benefits and is one of the world's biggest IT consulting, outsourcing and proficient administrations organizations with more than 200,000 representatives in more than 40 countries, of whom almost 100,000 are in India. It was established in 1967 by Serge Kampf in Grenoble, France.

**Deloitte Touche Tohmatsu Limited:** Deloitte Touche Tohmatsu Limited regularly alluded or called to as Deloitte, is a UK-joined or incorporated multinational expert organization or firm. Deloitte is one of the "Huge Four" bookkeeping associations and the biggest expert administrations arrange on the planet by income and number of professionals. Deloitte gives a review, impose, Consulting, venture chance and monetary warning administrations with in excess of 263,900 experts all around.

10. STRATEGIES AGAINST ITS COMPETITORS

Accenture uses many strategies against its competitors to win over them and to sustain in the market. Some of the strategies are;

**Switching costs:** Accenture works with 91 of the Fortune Global 100 companies and more than three-quarters of the Fortune Global 500. These client relationships tend to be sticky. Accenture
consultants work very closely with clients and learn a lot about the clients' businesses, and, over time, consultants become indispensable. Of Accenture's top 100 clients, 92 have been clients of Accenture for at least 10 years. These client relationships are also crucial as reference clients when bidding for new business.

**Scale and scope:** Accenture is one of the world's largest consulting firms, and it serves the world's largest organizations, the Global 2000. These clients operate globally and at a huge scale, and they need partners to operate at the same level. For instance, a typical systems integration project or outsourcing deal might require putting 50 or more experienced consultants on site, in addition to another 50 developers off-site. Only a handful of firms have the ability to operate at this scale, which generates pricing power for those handfuls of firms. Accenture has a very broad offering of services - from up-front McKinsey-type strategy consulting to back-end outsourcing. Thus, Accenture can honestly offer clients a one-stop shop to improve their business. In Accenture-speak, it's called "transformation," which is a holistic approach to solving business problems. Very few if any other firms have Accenture's broad scope of capabilities to go from development of a business solution through to implementation, including expertise in business processes, industry issues, technology, and back-office functions.

**Intellectual property:** Accenture has multiple delivery methodologies, playbooks, offerings, and the like. This is a codification of past work, which makes it easier and quicker to deliver new, similar work. As such, Accenture consultants don't walk into a new engagement empty handed -- they will be armed with an instruction manual. This allows the firm leverage intelligent, hard-working, junior people who tend to be inexpensive and high performers.

**Brand:** The Accenture brand was ranked No. 41 on Interbrand's 2013 list of the Best Global Brands. The brand conveys three distinct advantages. First, it offers downside-protection to CTOs and CIOs that hire Accenture. If an engagement goes wrong, they're not likely to take flak for hiring a no-name. If an Accenture engagement goes wrong, the CIO/CTO has the automatic out. Second, as a global brand, purchasing officers will seek out Accenture. As part of their job, they want to know someone at Accenture, and if a request for proposal is going out, Accenture will be included in the list. Third, and perhaps most importantly, Accenture's brand is a differentiator in the recruiting process. Junior-level hires want a brand-name on their resumes to start their careers, and senior-level hires, rain-makers that exist in small numbers, want to be selling a premier service. Accenture does face competition, but this combination of factors gives the company an edge that allows it to generate economic profits, even in the face of competition.

**11. SWOT ANALYSIS**

The Accenture can be analyzed using Strengths, Weaknesses, Opportunities, and Challenges by considering different aspects [20-34].

**Strengths in the SWOT analysis of Accenture:**

- **World's biggest consulting organization:** as far as income it's the world's biggest Consulting or consulting organization which for the most part centers around IT and business consultancy. It has fabulous business morals and uncompromising benchmarks for superior.
- **Strong Clientele:** It has an expansive customer base with some first-class organizations having Accenture as their specialists. About 90 out of the fortune top 100 organizations and in excess of seventy-five percent of fortune worldwide 500 organizations have Accenture as a consulting organization.
- **Service Delivery Network:** Accenture has worldwide administration conveyance coordinate with nearness in excess of 200 urban communities, 56 nations and utilizing 390,000 enthusiastic representatives ceaselessly attempting to give ideal administration conveyance to end clients.
- **Client-Driven procedures:** The strong business relations and customer-driven approach initiated and maintained by Accenture causes them in making industry based, supportable incentive for their Consulting accomplices.
- **Continuous change:** Like Kaizen of Toyota, Accenture is continually looking towards enhancing its abilities, contracting better and more capable labour, accordingly coordinating their guarantee to the end clients.
Diverse abilities: With its five working gatherings specifically interchanges, Media and innovation, budgetary administrations, wellbeing & public administrations and item assets it has made various capacities inside its group. Committed and prepared labour for every vertical is the thing that separates Accenture from the rest.

Expertise: With its customer base extending from social insurance to vehicle to IT benefits, Accenture has a ton of experience and the ability behind it to complete things. Thus, Accenture has turned into the "authority" or "specialists" crosswise over various ventures.

Weaknesses in the SWOT analysis of Accenture:
- Lack of coordination: Accenture has 19 specialty units cooperatively working with the customers and with each other. This prompts clashes because of the absence of inward coordination.
- Dependency on its Consulting/consulting business: Although its business is in administration, consulting, innovation, and BPO, yet the Consulting part frames the significant wellspring of income for Accenture. This can be risky for the organization over the long haul since running such a huge task requires, to the point that the firm is prepared for terrible money related days.

Opportunities in the SWOT analysis of Accenture:
- Expansion of business: By focusing on little and fair sized ventures and extending to other creating economies (Market improvement), Accenture can build its income much more.
- Acquisitions: Accenture as of late gained 'Gaspo', an investigation arrangement supplier based out of Brazil. It likewise gained Agilex advances, which is a computerized and IT administrations supplier for U.S Govt. offices. Such acquisitions can build the scientific quality of Accenture along these lines helping it in development.
- Focusing on different organizations: More spotlight on innovation and BPO, and making the income comparable to consulting, can assist the firm in penetrating the market far and away superior. Likewise, this expansion will give a pad amid brutal monetary circumstances.

Threats in the SWOT analysis of Accenture:
- Competition: Tough rivalry from IT big companies like IBM, Capgemini, Infosys is the territory of worry for the organization.
- Improper and un-efficient monetary circumstances: During the subsidence time frame it was intense for the organization due to over reliability on premium customers. The vast customers were the initial ones which got influenced severely by the budgetary downturn. What's more, thus the income drive to Accenture dropped gravely.

12. CONCLUSION
In this paper, we have discussed the main reasons for the sustainable growth of Accenture in the world market. The company business strategy is a model for other companies in this industry and teaches that every company should follow the long-term goal, planning, correct decision making at right time, maintaining good relations with employees, customers and stakeholders for prosperous growth. Further, building team co-ordination in a correct way, use of better technologies in production and making the right decision at right time to improve the product are essentials for a sustainable company. These points are useful for the success of the organization in the market. The Accenture business strategies are discussed as per the guidelines are given in Company analysis case study methodology [35-39] to understand its sustainable business strategy.
