| Section/topic | Item No | Checklist item | Reported on Page Number/Line Number | Reported on Section/Paragraph |
|--------------|---------|----------------|-------------------------------------|-------------------------------|
| TITLE        |         |                |                                     |                               |
| Title        | 1       | Identify the report as a systematic review, meta-analysis, or both. | Page 1, Line 2 | Title |
| ABSTRACT     |         |                |                                     |                               |
| Structured summary | 2 | Provide a structured summary including, as applicable: background; objectives; data sources; study eligibility criteria, participants, and interventions; study appraisal and synthesis methods; results; limitations; conclusions and implications of key findings; systematic review registration number. | Page 1-2, Line 24-54 | Abstract |
| INTRODUCTION |         |                |                                     |                               |
| Rationale    | 3       | Describe the rationale for the review in the context of what is already known. | Page 2, Line 60-79 | Introduction, Paragraph 1-2 |
| Objectives   | 4       | Provide an explicit statement of questions being addressed with reference to participants, interventions, comparisons, outcomes, and study design (PICOS). | Page 2, Line 79-82 | Introduction, Paragraph 2 |
| METHODS      |         |                |                                     |                               |
| Protocol and registration | 5 | Indicate if a review protocol exists, if and where it can be accessed (e.g., Web address), and, if available, provide registration information including registration number. | N/A | N/A |
| Eligibility criteria | 6 | Specify study characteristics (e.g., PICOS, length of follow-up) and report characteristics (e.g., years considered, language, publication status) used as criteria for eligibility, giving rationale. | Page 3, Line 101-111 | Methods, Selection criteria |
| Information sources | 7 | Describe all information sources (e.g., databases with dates of coverage, contact with study authors to identify additional studies) in the search and date last searched. | Page 2-3, Line 88-97 | Methods, Study selection |
| Search       | 8       | Present full electronic search strategy for at least one database, including any limits used, such that it could be repeated. | Page 3, Line 93-95 | Methods, Study selection |
| Study selection | 9 | State the process for selecting studies (i.e., screening, eligibility, included in systematic review, and, if applicable, included in the meta-analysis). | Line 97-98, Line 111-115, Line 154 | Methods, Study selection, Selection criteria, Search results |
| Data collection process | 10 | Describe method of data extraction from reports (e.g., piloted forms, independently, in duplicate) and any processes for obtaining and confirming data from investigators. | Line 113-114 | Methods, Selection criteria |
| Data items   | 11      | List and define all variables for which data were sought (e.g., PICOS, funding sources) and any assumptions and simplifications made. | Line 105-109, Line 155 | Methods, Selection criteria, Search results |
| **Risk of bias in individual studies** | 12 | Describe methods used for assessing risk of bias of individual studies (including specification of whether this was done at the study or outcome level), and how this information is to be used in any data synthesis. | Page 3, Line 117-128 | Quality assessment |
| **Summary measures** | 13 | State the principal summary measures (e.g., risk ratio, difference in means). | Page 4, Line 140-142 | Statistical analysis |
| **Synthesis of results** | 14 | Describe the methods of handling data and combining results of studies, if done, including measures of consistency (e.g., I²) for each meta-analysis. | Page 4, Line 135-142, Line 147-148 | Statistical analysis |
| **Risk of bias across studies** | 15 | Specify any assessment of risk of bias that may affect the cumulative evidence (e.g., publication bias, selective reporting within studies). | Page 3, Line 129-132 | Quality assessment |
| **Additional analyses** | 16 | Describe methods of additional analyses (e.g., sensitivity or subgroup analyses, meta-regression), if done, indicating which were pre-specified. | Page 4, Line 146-147 | Statistical analysis |

**RESULTS**

| **Study selection** | 17 | Give numbers of studies screened, assessed for eligibility, and included in the review, with reasons for exclusions at each stage, ideally with a flow diagram. | Page 4, Line 153-155 | Search Results |
| **Study characteristics** | 18 | For each study, present characteristics for which data were extracted (e.g., study size, PICOS, follow-up period) and provide the citations. | Page 4, Line 153-156 | Search Results |
| **Risk of bias within studies** | 19 | Present data on risk of bias of each study and, if available, any outcome level assessment (see item 12). | Page 3, Line 129-132 | Quality assessment |
| **Results of individual studies** | 20 | For all outcomes considered (benefits or harms), present, for each study: (a) simple summary data for each intervention group (b) effect estimates and confidence intervals, ideally with a forest plot. | Page 4-5, Line 158-194 | Results, Paragraph 2-3 |
| **Synthesis of results** | 21 | Present results of each meta-analysis done, including confidence intervals and measures of consistency. | Page 4-5, Line 158-194 | Results, Paragraph 2-3 |
| **Risk of bias across studies** | 22 | Present results of any assessment of risk of bias across studies (see Item 15). | Page 3, Line 129-132 | Quality assessment |
| **Additional analysis** | 23 | Give results of additional analyses, if done (e.g., sensitivity or subgroup analyses, meta-regression [see Item 16]). | Page 5, Line 196-203 | RC with ileal conduit |

**DISCUSSION**

| **Summary of evidence** | 24 | Summarize the main findings including the strength of evidence for each main outcome; consider their relevance to key groups (e.g., healthcare providers, users, and policy makers). | Page 5-7, Line 206-276 | Discussion, Paragraph 1-4 |
| **Limitations** | 25 | Discuss limitations at study and outcome level (e.g., risk of bias), and at review-level (e.g., incomplete retrieval of identified research, reporting bias). | Page 7, Line 277-295 | Discussion, Paragraph 5 |
| **Conclusions** | 26 | Provide a general interpretation of the results in the context of other evidence, and implications for future research. | Page 7-8, Line 302-311 | Conclusions |
| FUNDING |
|---------|
| Funding | 27 | Describe sources of funding for the systematic review and other support (e.g., supply of data); role of funders for the systematic review. | Line 325-331 | Disclosure statement |
