AN ASSESSMENT OF THE EFFECTIVENESS OF SUPPORT FOR UNIVERSITY PROGRAMS FROM THE HUMAN CAPITAL OPERATIONAL PROGRAM IN YEAR 2017-2030.
Abstract

The article presents the ways of support from European funds in the development of student competencies and organizational innovation in the field education. It is based on a case study of the project ‘Inżynieria materiałowa – inżynieria przyszłości’ (Material engineering – engineering of the future’), financed by the European Social Fund in Poland. The project was implemented at the Faculty of Mechanical Engineering of the Cracow University of Technology in the years 2012-15. The research methods used are critical analysis of literature sources, surveys and a case study of the project mentioned above.
