For changes to the authorship of manuscripts, Frontiers requires that all authors complete and sign the ‘Authorship Change’ form. The affected author(s) must also sign this form as a way of consenting to the change(s) and agreeing to the new Author Contributions, Conflict of Interest and Acknowledgment sections.

In accordance with the ICMJE guidelines, when determining authorship the following criteria should be observed:

- Substantial contributions to the conception or design of the work; or the acquisition, analysis, or interpretation of data for the work; AND
- Drafting the work or revising it critically for important intellectual content; AND
- Final approval of the version to be published; AND
- Agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

Contributors who meet fewer than all 4 of the above criteria for authorship should not be listed as authors, but they should be acknowledged (as per the ICMJE guidelines).

If you have any questions please contact us.

Please note that we cannot proceed until this issue has been resolved.

Note that the form should be manually signed or contain valid e-signatures (an electronic version of a signature that can be uniquely identified and linked to the signatory, as shown in the example below). Typed names are not considered valid e-signatures.

- Digital stylus to sign the form can be used.
- The signatures can be on multiple versions of the form as long as the main information is filled in.
- If the signatures are on multiple files, you can zip these and upload them together.

Should you provide a form with invalid signatures, we will not be able to consider your request for authorship change.
