Contents

Young Researchers Advancing Computational Science: Perspectives of the Young Scientists Conference 2015
A.V. Boukhanovsky, V.A. Ilyin, V.V. Krzhizhanovsky, G.A. Athanassoulis, A.A. Klimentov, P.M.A. Sloot ................................. 1

Computational models, methods and high-performance algorithms
Models, Representations and Comparisons in Computer Simulations
L. Gulyás, G. Kamps ................................................................. 5
Multi-chimera States in the Leaky Integrate-and-Fire Model
N.D. Tsigkri-DeSmedt, J. Hizanidis, P. Hövel, A. Provata ................................................................. 13
Analytical and Numerical Investigation for The Problem of Optimal Control of Nonlinear System via Quadratic Criteria
A.P. Afanas’ev, S.M. Dzyuba, I.I. Emelyanova ................................................................. 23
Exact Stationary Solutions to a Class of Non-linear Stochastic Oscillators. Establishing New Benchmark Cases for Testing Numerical Solution Schemes
K.I. Mamić, G.A. Athanassoulis ................................................................. 33
Adaptation of Kurganov-Tadmor Numerical Scheme for Applying in Combination with the PISO Method in Numerical Simulation of Flows in a Wide Range of Mach Numbers
M. Kraposhin, A. Bobtvriko, S. Strijhak ................................................................. 43
Heterogeneous Parallel Computations for Solving Global Optimization Problems
I. Lebedev, V. Gergel ................................................................. 53
Parallel Algorithm for Local-best-match Time Series Subsequence Similarity Search on the Intel MIC Architecture
A.V. Movchan, M.L. Zymbler ................................................................. 63
Parallel Implementation of Vortex Element Method on CPUs and GPUs
K. Kuzmina, I. Marchevsky, V. Moreva ................................................................. 73
Heuristic Algorithm for Approximation Betweenness Centrality Using Graph Coarsening
M. Chernoskuto, V. Ineichen, C. Bekas ................................................................. 83

Computational physics, chemistry and engineering
Significant Feature Selection in Neural Network Solution of an Inverse Problem in Spectroscopy
A. Efroymson, S. Burikov, T. Dolenko, K. Laptinskiy, S. Dolenko ................................................................. 93
Augmenting Ship Propulsion in Waves Using Flapping Foils Initially Designed for Roll Stabilization
E.S. Filipas ................................................................. 103
Mathematical Modeling of Underground Construction Temperature Influence on Permafrost Soils
V.S. Borsiev ................................................................. 112
FEM Hydroelastic Models with Application to the Nonlinear Response of Large Floating Bodies in Shallow Wave Conditions
A.E. Karperaki ................................................................. 122
Virtual Basin for Simulating Ship Sailing Qualities on HPC Resources
A. Aksenov, A. Pechenyuk, A. Poyda, E. Ryabinin, I. Tkachenko, V. Ilyin, V. Velikho ................................................................. 132
Multi-agent Simulation of Passenger Evacuation Considering Ship Motions
M. Balakhontceva, V. Karbovskii, D. Rybokonenko, A. Boukhanovskiy ................................................................. 140
Development of a Dynamic Library for Computational Aeroacoustics Applications Using the OpenFOAM Open Source Package
A. Epikhin, I. Evdokimov, M. Kraposhin, M. Kalugin, S. Strijhak ................................................................. 150
Adaptation of SPSIM for Simulation of Diffraction Images in XFEL Experiments
S.A. Bobkov, A.B. Teslyuk, V.A. Ilyin ................................................................. 158
Different Criteria of Dynamic Routing
Kurochkin, Grinberg ................................................................. 166

Computational Environmental Science
Numerical Simulation of Non-linear Water Waves over Variable Bathymetry
C.E. Papoutsellis ................................................................. 174
Special Aspects of Wind Wave Simulations for Surge Flood Forecasting and Prevention
S.S. Kosukhin, A.V. Kalyuzhnaya, A.V. Nikishova, A.V. Boukhanovsky ................................................................. 184
Solution of Large-scale Seismic Modeling Problems
N. Khokhlov, N. Yavich, M. Malovichko, I. Petrov ................................................................. 191

doi:10.1016/S1877-0509(15)03440-7
Mathematical Modeling of a River Stream Based on a Shallow Water Approach
V. Churuksaeva, A. Starchenko ................................................................. 200
Extreme Value Analysis of Dynamical Wave Climate Projections in the Mediterranean Sea
Z.G. Kapelonis, P.N. Gavrilidas, G.A. Athanassoulis ................................ 210
Dynamic Selection of Ensemble Members in Multi-Model Hydrometeorological Ensemble Forecasting
A.V. Krikunov, S.V. Kovalchuk ................................................................. 220
Interjacent Steps Recovering of Flood Front Modeling
V. Shmelev, A. Bezugdov, V. Karbovskii ............................................... 228
Digital Earth and Evolution of Cartography
E. Eremchenko, V. Tikunov, R. Ivanov, L. Massel, J. Strobl ..................... 235

Computational economics, social and human sciences
Intersections of Political and Economic Relations: A Network Study
Z. Főző, L. Gulyás, G. Kampis ................................................................. 239
Business Networks. An Analysis of Influential Businessmen Within the Network of the FIDESZ Party in Hungary
D. Csik, L. Gulyás, G. Kampis ................................................................. 247
Using Multiplex Networks for Banking Systems Dynamics Modelling
Y.V. Guleva, M.V. Skvorcova, A.V. Boukhanovsky ................................ 257
Data-driven Modeling of Airlines Pricing
A. Lantsева, K. Mukhina, A. Nikishova, S. Ivanov, K. Knyazkov ............. 267
Syntactic Analysis of the Sentences of the Russian Language Based on Neural Networks
A.G. Shoev, R. Rybka, I. Moloshnikov, D. Gudovskikh ............................. 277
Evolutionary-based Framework for Optimizing the Spread of Information on Twitter
N. Butakov, Y. Chuprova, K. Knyazkov, N. Shindyapina, A. Boukhanovsky 287
An Algorithm of Finding Thematically Similar Documents with Creating Context-semantic Graph Based on Probabilistic-entropy Approach
Moloshnikov I.A., Shoev A.G., Rybka R.B., Gudovskikh D.V. ................. 297
A Quantitative Method of Text Emotiveness Evaluation on Base of the Psycholinguistic Markers Founded on Morphological Features
A. Shoev, D. Gudovskikh, R. Rybka, I. Moloshnikov ............................... 307
Agent-based Modeling of Crowd Dynamics on a Moving Platform
D. Rybokonenko, M. Balakhontseva, D. Voloshin, V. Karbovskii ............. 317
Cognitive Television Viewer Rating
E. Panova, A. Raikov, O. Smirnova ......................................................... 328

Computational city science
Data-driven Modeling of Transportation Systems and Traffic Data Analysis During a Major Power Outage in the Netherlands
V.R. Melnikov, V.V. Krzhizhanovskaya, A.V. Boukhanovsky, P.M.A. Sloot 336
Mental Benchmarks and Opinion Dynamics for Modeling Potentially Critical Situations on a Regional Level
S.A. Mityagin, O.B. Tikhonova, S.V. Ivanov, A.V. Boukhanovsky ............. 346
Data-driven Modeling of MRT-based Population Mobility Using Impersonal Data
O.O. Vyatkina, A.V. Kuriilkin, K.D. Mukhina, S.A. Mityagin, A.V. Boukhanovsky 356
Evaluation of Urban Mobility Using Surveillance Cameras
A.V. Kuriilkin, O.O. Vyatkina, S.A. Mityagin, S.V. Ivanov ........................ 364
Optimization-based Calibration for Micro-level Agent-based Simulation of Pedestrian Behavior in Public Spaces
D. Voloshin, D. Rybokonenko, V. Karbovskii ........................................... 372
Efficient Information Distribution Using Human Mobility
G. Kampis, T. Franke, S. Negele, P. Lukowicz ....................................... 382

Computational biomedicine
Personalized Clinical Decision Support with Complex Hospital-Level Modelling
S.V. Kovalchuk, K.V. Knyazkov, I.I. Syomov, A.N. Yakovlev, A.V. Boukhanovsky 392
Human Heart Simulation Software for Parallel Computing Systems
S. Pravdin, K. Ushenin, A. Sozykin, O. Solovyova .................................... 402
On the Possible Interaction Mechanism between Collateral Vessels and Restenosis
P.S. Zun, A.G. Hoekstra ............................................................................. 412
Evaluation of Dynamic Ambulance Routing for the Transportation of Patients with Acute Coronary Syndrome in Saint-Petersburg
K. Knyazkov, I. Derevitsky, L. Mednikov, A. Yakovlev .............................. 419

Distributed computing technologies
Web Toolkit for Scientific Research: State of the Art and the Prospect for Development
S.P. Polyakov, A.P. Demichev, A.P. Kryukov ............................................. 429
Contents

Introducing New Backfill-based Scheduler for SLURM Resource Manager
S. Leonenkov, S. Zhumaty

FTS3/WebFTS – A Powerful File Transfer Service for Scientific Communities
A. Kiryanov, A. Alvarez Ayllon, O. Keeble

CAVE 3D: Software Extensions for Scientific Visualization of Large-scale Models
N. Melnikova, S. Orlov, N. Shabrov, V. Kiev, A. Kuzin, M. Resch, U. Woessner, M. Aumüller

Improved Force-Directed Method of Graph Layout Generation with Adaptive Step Length
D. Egorov, A. Bezgodov

The Method for Real-time Cloud Rendering
K. Mukhina, A. Bezgodov

An Efficient Approach of Infrastructure Processing Visualization within Cloud Computing Platform
A. Zagarskikh, A. Karsakov, K. Mukhina, D. Nasonov, A. Bezgodov

Education in computational science

An Approach of Learning Path Sequencing Based on Revised Bloom’s Taxonomy and Domain Ontologies with the Use of Genetic Algorithms
V. Shmelev, M. Karpova, A. Dukhanov

Interactive Educational Content Based on Augmented Reality and 3D Visualization
S. Sannikov, F. Zhdanov, P. Chebotarev, P. Rabinovich

Improving Visualization Courses in Russian Higher Education in Computational Science and High Performance Computing
A. Karsakov, A. Bilyatdinova, A. Bezgodov
