Supplementary Figure S1. Analysis of 30 BRCA1 missense variants in HeLa cells

A, Whole cell lysates of the samples in Fig. 1C were analyzed by western blotting. B, HeLa cells were treated with the indicated concentrations of olaparib for 5 days. Data represent the mean ± SEM of three independent experiments. Ctrl: cells transfected with the non-target siRNA and the empty vector; KD: cells transfected with the target siRNA and the empty vector; WT: cells transfected with the target siRNA and the wild-type BRCA1 expression vector.
