Religious preach as sub of sociocultural comlexity people that develop from ritual religious for made supranatural concept by side external to extend belief and faith with variation and characteristics by Guru Zaini’s.

Keywords: language variations, preach

Preliminary

Language and level of society appear in certain languages. The level of society is divided into several classes, these classes have specific language forms, both variations, variations or distinctive dialects. If we concern language speakers B anchor , then it is easy to identify the variations in pronunciation or vocabulary of a group of premises difference n the other banjo ethnic groups. Soeparno (2002) states that every society is certain to own and use the social communication tools. There is no society without language, and there is no language without community. language has an important role for develop identity religion in education, behavior and social for society (Skerret, 2017). The use of the Banjar language in everyday conversation and relationships in South Kalimantan and its surroundings is more dominant compared to Indonesian. The Banjar language is in the category of quite safe from extinction because it is still used as a colloquial language. The Banjar people are the Banjar ethnic community group.

Winchester suggested that religion has function as conceptualize phenomena for create resource of critical which helping society for uncover and solve the problem by constructive (2016). It happen either to guru Zaini's preach whose help society to practice the religion theory in they are life. Religious and culture is manner of people to how express they are knowledge and ethic are with physicolgy phenomena and social fact to learn religious values and internalize for their own sense of religious identity (Einol, 2011). Religious preach as sub of sociocultural comlexity people that develop from ritual religious for made supranatural concept
by side external to extend belief and faith (Purzyki, B.G, et al., 2017; Atran & Henrich; Bulbulia et al., 2013; Henrich, 2009; Norenzayan, 2013; Norenzayan et al., 2016).

Indonesia is an Islamic country which for all manner show religion identity for society like education, lifestyle, activity for primary think in they are as entity society covers language, norm, sign, interaction, connection, power, and authority the as productive activities religious (Guhin, 2014; Parker, 2014). Islam is faith and culture has complex variation as language, culture, local wisdom, and entity that create social system (Ahmad, 2016). Indonesia In this study, researchers will examine the language variations of a teacher who is well known and charismatic. Beliau is Al Allamah Al Arif Billah or Maulana Shaykh Muhammad Zaini Abdul Ghani, or commonly called the Gathering Guru. The Sekumpul Guru was born in Martapura, known as the Veranda of Mecca. The name was born because Martapura gave birth to many scholars, the Sekumpul Guru was a large human figure, a very admirable person. Sekumpul Guru were indeed unique and phenomenal figures. Older people like him were not only rare, but also almost nothing anymore in this era. Guru Sekumpul including a figure who is missed. In terms of naming Sekumpul, Guru Zaini also explained that while joking Sekumpul means not gathering, God willing, because we did not gather here until heaven (Kariem, 2015: 75).

Method

This research method is a qualitative method. The approach used in this research is the Sociolinguistic approach that analyzes the use of language variations in the preach of Guru Zaini Ghani in South Kalimantan. Sources of data in qualitative research in the form of verbal speech derived from informants based on certain considerations and soliciting information as language users in communication in each particular area with the aim of detailing the specificities that exist in that context. Data collection in this study was done by selecting the video to be analyzed, transcribing data that already exist, and using text observation techniques. Text observation technique is by collecting all the data that can be taken in accordance with the problem under study. The data analysis process begins by examining all available data. Data analysis is the record that produces field notes, with it coded so that the data source can still be traced.

Results and Discussion
