On page 612, November number of the Journal, the tables for eleven years were used instead of those of nine years as here given.

Thirteen Years.

In front the appearance is much the same as it is at twelve years. In profile, the notch of the superior corner is larger, the inferior corner appears narrow, with its borders parallel. The plate, drawn from a mare’s mouth, shows rudimentary tusk teeth. The inferior tables are round and generally leveled. The superior corners are generally leveled. In the superior pincers the cups are rounded.

[to be continued.]

Erratum.

Nine Years,
