Supplementary Table S1. List of primers used for RT-qPCR. For primers, F indicates forward and R – revers.

| Gene   | Primer | Sequence 5’ → 3’ | Primer Length [nt] | Amplicon Length [nt] | Annealing Temperature [°C] |
|--------|--------|-------------------|--------------------|----------------------|---------------------------|
| BCL10  | F      | AATACCATCTTCTCTCTCA | 18                 | 91                   | 56 °C                     |
