Supplementary Table 1. Specific exposures assigned to wood-related jobs in the NOCCA-JEM

| Wood-related jobs | Exposures | Other occupations exposed |
|-------------------|-----------|---------------------------|
| Upholsterers      | Wood dust | Chemists                  |
| Timbermen         |           | Laboratory assistants     |
| Sawyers           |           | Service station attendants |
| Plywood and fibreboard workers | | Well drilling and quarrying |
| Construction carpenters | | Leather cutters for footwear |
| Wooden boatbuilders, coach-body builders etc. | | Shoe sewers |
| Bench carpenters  |           | Lasters and sole fitters etc. |
| Cabinetmakers and joiners etc. | | Footwear workers, nec |
| Woodworking machine operators etc. | | Machine and engine mechanics |
| Wooden surface finishers | | Painters, lacquerers and floor layers |
| Woodworking occupations, n.e.c. | |                            |
| Upholsterers      | Benzene   | Service station attendants |
| Woodworking occupations, n.e.c. | | Leather cutters for footwear |
|                   |           | Shoe sewers                |
|                   |           | Lasters and sole fitters etc. |
|                   |           | Footwear workers, nec      |
|                   |           | Machine and engine mechanics |
|                   |           | Painters, lacquerers and floor layers |
| Upholsterers      | Toluene   | Service station attendants |
| Woodworking occupations, n.e.c. | | Leather cutters for footwear |
|                   |           | Shoe sewers                |
|                   |           | Lasters and sole fitters etc. |
|                   |           | Footwear workers, nec      |
|                   |           | Machine and engine mechanics |
|                   |           | Painters, lacquerers and floor layers |
| Upholsterers                      | Methylene chloride | Lasters and sole fitters etc.  
Machine and engine mechanics  
Electronics and telecommunications workmen  
Electrical and electronic equipment assemblers  
Painters, lacquerers and floor layers  

| Upholsterers                      | 1,1,1-Trichloroethane | Lasters and sole fitters etc.  
Occupations in smelting, metallurgical and foundry work, nec  
Turners, toolmakers and machine-tool setters  
Machine and engine mechanics  
Metal plating and coating work  
Assemblers and other machine and metalware occupations  
Electronics and telecommunications workmen  
Electrical and electronic equipment assemblers  
Painters, lacquerers and floor layers  

| Upholsterers  
Wooden surface finishers | Aliphatic and alicyclic hydrocarbon solvents | Leather cutters for footwear  
Shoe sewers  
Lasters and sole fitters etc.  
Footwear workers, nec  
Machine and engine mechanics  
Painters, lacquerers and floor layers  

| Upholsterers  
Bench carpenters | Aromatic hydrocarbon solvents | Chemists  
Laboratory assistants  
Service station attendants  
Leather cutters for footwear  
Shoe sewers  
Lasters and sole fitters etc.  
Footwear workers, nec  
Painters, lacquerers and floor layers  

| Sawyers  
Plywood and fibreboard workers  
Woodworking machine operators etc.  
Wooden surface finishers  
Woodworking occupations, n.e.c. | Chromium | Metal smelting furnacemen  
Heat treaters, hardeners, temperers etc.  
Cold- and hot-rolling metal workers  
Smiths  
Foundry workers  
Wire and pipe drawers  
Occupations in smelting, metallurgical and foundry work, nec  
Turners, toolmakers and machine-tool setters  
Fitter-assemblers etc.  
Machine and engine mechanics  
Sheet metal workers  
Plumbers  
Welders and flame cutters  
Metal plating and coating work  
Assemblers and other machine and metalware occupations  
Painters, lacquerers and floor layers |
| Industry/Occupation                                                                 | Hazard                  |
|-----------------------------------------------------------------------------------|-------------------------|
| Sawyers and plywood and fibreboard workers                                         | Fungicides              |
| Farmers, horticulturists, silviculturists, commercial garden and park workers      |                         |
| Forestry workers and lumberjacks                                                    |                         |
| Cookers and furnacemen (chemical processes)                                        |                         |
| Plywood and fibreboard workers                                                      | Formaldehyde            |
| Technical nursing assistants                                                        |                         |
| Livestock breeders                                                                  |                         |
| Forestry workers and lumberjacks                                                    |                         |
| Textile finishers, dyers                                                            |                         |
| Textile inspectors                                                                  |                         |
| Patternmakers and cutters (also leather garments and gloves)                       |                         |
| Industrial sewers etc. (also leather garments and gloves)                          |                         |
| Foundry workers                                                                     |                         |
| Welders and flame cutters                                                           |                         |
| Metal plating and coating work                                                       |                         |
| Electronics and telecommunications workmen                                           |                         |
| Painters, lacquerers and floor layers                                               |                         |
| Plywood and fibreboard workers                                                      | Insecticides            |
| Farmers, horticulturists, silviculturists, commercial garden and park workers      |                         |
| Plywood and fibreboard workers                                                      | Quartz dust             |
| Miners, shot firers etc.                                                            |                         |
| Well drilling and quarrying                                                         |                         |
| Concentration plant workers                                                         |                         |
| Miners and quarrymen, nec                                                           |                         |
| Metal smelting furnacemen                                                           |                         |
| Foundry workers                                                                     |                         |
| Occupations in smelting, metallurgical and foundry work, nec                        |                         |
| Reinforced concrete layers, masons and plasterers                                   |                         |
| Concrete shutterers and finishers                                                   |                         |
| Plywood and fibreboard workers                                                      | Asbestos                |
| Miners, shot firers etc.                                                            |                         |
| Concentration plant workers                                                         |                         |
| Miners and quarrymen, nec                                                           |                         |
| Railway engine drivers, steam engine firemen                                        |                         |
| Metal smelting furnacemen                                                           |                         |
| Fitter-assemblers etc.                                                              |                         |
| Machine and engine mechanics                                                        |                         |
| Sheet metal workers                                                                 |                         |
| Plumbers                                                                           |                         |
| Welders and flame cutters                                                           |                         |
| Electricians                                                                        |                         |
| Electronics and telecommunications workmen                                          |                         |
| Painters, lacquerers and floor layers                                               |                         |
| Bricklayers, plasterers and tile setters                                             |                         |
