## Glyco-Forum Section

Meeting and Course Announcements

Obituary: Christian Rudolf Hubert Raetz, MD PhD, 1946–2011

The Raetz Pathway for Lipid A Biosynthesis

## Communication

Size determination of hyaluronan using a gas-phase electrophoretic mobility molecular analysis

L Malm, U Hellman, and G Larsson

## Original Articles

Glycomic analysis of human mast cells, eosinophils and basophils

SJ North, S von Gunten, A Antonopoulos, A Trollope, DW MacGlashan Jr, J Jang-Lee, A Dell, DD Metcalfe, AS Kirshenbaum, BS Bochner, and SM Haslam

The GH18 family of chitinases: Their domain architectures, functions and evolutions

Q-S Huang, X-L Xie, G Liang, F Gong, Y Wang, X-Q Wei, Q Wang, Z-L Ji, and Q-X Chen

Computational analyses of the catalytic and heparin-binding sites and their interactions with glycosaminoglycans in glycoside hydrolase family 79 endo-β-D-glucuronidase (heparanase)

NS Gandhi, C Freeman, CR Parish, and RL Mancera

Crystal structure of a β-prism II lectin from Remusatia vivipara

KN Shetty, GG Bhat, SR Inamdar, BM Swamy, and K Suguna

Regulation of O-acetylation of sialic acids by sialate-O-acetyltransferase and sialate-O-acetylesterase activities in childhood acute lymphoblastic leukemia

C Mandal, C Mandal, S Chandra, R Schauer, and C Mandal

Role of interaction of mannan-binding protein with meprins at the initial step of complement activation in ischemia/reperfusion injury to mouse kidney

M Hirano, BY Ma, N Kawasaki, S Oka, and T Kawasaki

Directing the biological activities of heparan sulfate oligosaccharides using a chemoenzymatic approach

Y Xu, Z Wang, R Liu, AS Bridges, X Huang, and J Liu

Polysialyltransferase overexpression in Schwann cells mediates different effects during peripheral nerve regeneration

J Jungnickel, M Eckhardt, K Haastert-Talini, P Claus, P Bronzlik, E Lipokatic-Takacs, H Maier, V Gieselmann, and C Grothe

The C-terminal domain of the Salmonella enterica WbaP (UDP-galactose:Und-P galactose-1-phosphate transferase) is sufficient for catalytic activity and specificity for undecaprenyl monophosphate

KB Patel, E Ciepichal, E Swiezewska, and MA Valvano

Inhibiting ice recrystallization and optimization of cell viability after cryopreservation

JL Chaytor, JM Tokarew, LK Wu, M Leclère, RY Tam, CJ Capicciotti, L Guolla, E von Moos, CS Findlay, DS Allan, and RN Ben
Characterization of the interaction of interleukin-8 with hyaluronan, chondroitin sulfate, dermatan sulfate and their sulfated derivatives by spectroscopy and molecular modeling

A Pichert, SA Samsonov, S Theisgen, L Thomas, L Baumann, J Schiller, AG Beck-Sickinger, D Huster, and MT Pisabarro

Essential role of Toll-like receptor 2 in macrophage activation by glycogen

R Kakutani, Y Adachi, H Takata, T Kuriki, and N Ohno

The fine specificity of mannose-binding and galactose-binding lectins revealed using outlier motif analysis of glycan array data

KA Maupin, D Liden, and BB Haab
