Letters

Aperiodic Sunflower-Like Metasurface for Diffusive Scattering and RCS Reduction .......................................................... M. K. T. Al-Nuaimi, W. Hong, and W. G. Whittow .......................... 1048
Circularly Polarized Stack Yagi RFID Reader Antenna .......................................................... Y. Pan and Y. Dong .......................................................... 1053
Wideband Angular Stable Absorber Based on Spoof Surface Plasmon Polariton for RCS Reduction .......................... J. Yu, W. Jiang, and S. Gong .......................................................... 1058
Broadband Spectral Numerical Green’s Function for Electromagnetic Analysis of Inhomogeneous Objects .......................... H. H. Gan, Q. I. Dai, T. Xia, W. C. Chew, and C.-F. Wang .......................................................... 1063
A mmW Broadband Dual-Polarized Dielectric Resonator Antenna Based on Hybrid Modes .......................... J. Kowalewski, J. Eisenbeis, A. Jauch, J. Mayer, M. Kretschmann, and T. Zwick .......................................................... 1068
A Reconfigurable Antenna With Sum and Difference Patterns for WLAN Access Points .......................................................... H. Sun, X. Ge, W. He, and L. Zhao .......................................................... 1073
AmmW Broadband Eight-Antenna Array Design for Sub-6 GHz 5G NR Bands Metal-Frame Smartphone Applications .......................... H.-D. Chen, Y.-C. Tsai, C.-Y.-D. Sim, and C. Kuo .......................................................... 1078
A Nodal Discontinuous Galerkin Time-Domain Method Based on Wave Equation .......................................................... Q. Yang, Y. Shi, Z. G. Ban, and S. C. Zhu .......................................................... 1083
A Circularly Polarized Dielectric Resonator Antenna and Its Reconfigurable Design .......................................................... W.-J. Sun, W.-W. Yang, L. Guo, W. Qin, and J.-X. Chen .......................................................... 1088
Synthesis of Nonuniformly Spaced Arrays With Frequency-Invariant Shaped Patterns by Sequential Convex Optimization .......................................................... Y. Gong, S. Xiao, and B. Wang .......................................................... 1093
High Port-to-Port Isolation Dual-Polarized Antenna Array Dedicated for Full-Duplex Base Stations .......................................................... D. Wójcik, M. Surma, A. Noga, and M. Magnuski .......................................................... 1098
Amplitude-Phase-Based Interval Analysis Method for Radomes With Thickness Errors and Its Robust-Design Application .......................................................... W. Xu, J. Zhang, P. Li, N. Hu, and Y. Qiu .......................................................... 1103
Skeletonization Improved Calculation of Electric Fields by the Impedance Matrix of MoM .......................................................... D. Wu, Y.-N. Liu, Y.-M. Wu, X.-M. Pan, and X.-Q. Sheng .......................................................... 1108
A Wideband Water Patch Antenna With Polarization Diversity .......................................................... H. Huang, S. Gao, S. Lin, and L. Ge .......................................................... 1113
A Curved 3-D Printed Microstrip Patch Antenna Layout for Bandwidth Enhancement and Size Reduction .......................................................... G. Muntoni, G. Montisci, G. A. Casula, F. P. Chietera, A. Michel, R. Colella, L. Catarinucci, and G. Mazzarella .......................................................... 1118
Compact Null Steering Antenna With Two Parasitic Elements for Angle-of-Arrival Estimation .......................................................... J. Tamura and H. Arai .......................................................... 1123

(Contents Continued on Back Cover)
A Compact, Monostatic, Co-Circularly Polarized Simultaneous Transmit and Receive (STAR) Antenna With High Isolation

D. Wu, Y.-X. Sun, B. Wang, and R. Lian

Self-Oscillating Circularly Polarized Active Integrated Monopole Antenna Using Cross-Coupled Pair and Inverted-L Strip

Y.-L. Tsai, H. N. Chu, and T.-G. Ma

Multiband Efficient Asymmetric Transmission With Polarization Conversion Using Chiral Metasurface

M. I. Khan, B. Hu, Y. Chen, N. Ullah, M. J. I. Khan, and A. R. Khalid

Dual-Polarization Wideband Sub-6 GHz Suspended Patch Antenna for 5G Base Station

M. Ciydem and E. A. Miran

Efficient Beamforming Technique Based on Sparse MIMO Array and Spatial Filter Bank

D. Nguyen, M. Zomorrodi, N. Karmakar, and K. Ho

High-Volume Parallel Mouse Vital-Sign Monitoring With Near-Field Coherent Sensing

X. Hui, J. Zhou, and E. C. Kan

Design of a Vertically Polarized Patch Antenna With Switchable Near-Endfire Beam Using Characteristic Mode Analysis

Z. Zhang, X. Fu, and S. Cao

Improved Channel Model and Analysis of the Effect of Bodies in Curved Tunnel Using Ray Tracing

S. Li, Y. Liu, L. Yao, and W. Cao

Backward Scattering of Electrically Large Standard Objects Illuminated by OAM Beams

K. Liu, H. Liu, W. E. I. Sha, Y. Cheng, and H. Wang

Design of Wideband Differentially Fed Multilayer Stacked Patch Antennas Based on Bat Algorithm

Z. Shao, L.-F. Qiu, and Y. P. Zhang

20 GHz Antenna Radiation Pattern Obtained From Near-Field Mapping With Electrooptic Probe on a Single Plane

G. Gaborit, P. Artillan, C. Bermond, G. Revillo, and G. Chevrier-Gros, and L. Davillaret

Line-of-Sight Probability for Channel Modeling in 3-D Indoor Environments

W. Yang, J. Zhang, A. A. Glazunov, and J. Zhang

Substrate Integrated Waveguide Filtering Horn Antenna Facilitated by Embedded Via-Hole Arrays

L. Liu, T.-L. Bai, J.-Y. Deng, D. Sun, Y. Zhang, T. Yong, S.-G. Zhou, and L.-X. Guo

Angularly Stable Frequency-Selective Surface Using Shifted Double-Sided Screens

X. Ma, Y. Liu, G. Wen, and A. Pan

A Lightweight Planar Ultrawideband UHF Monopole Mills Cross Array for Ice Sounding

J. A. Nunn, L. Li, S. Yan, C. O’Neill, C. D. Simpson, P. Gogineni, and D. Dahl-Jensen

Absorptive Coding Metasurface With Ultrawideband Backscattering Reduction

L. Zhou and Z. Shen

Fast and Robust Variable-Step-Size LMS Algorithm for Adaptive Beamforming

B. Jalal, X. Yang, Q. Liu, T. Long, and T. K. Sarkar

Enhanced Deep Learning Approach Based on the Deep Convolutional Encoder–Decoder Architecture for Electromagnetic Inverse Scattering Problems

H. M. Yao, L. Jiang, and W. E. I. Sha

Aperture Amplitude Field Integrated Design of Receiving and Transmitting Antenna for Microwave Power Transmission

S. Zhang, L. Song, B. Duan, and S. Lou

A Taylor-Surrogate-Model-Based Method for the Electrical Performance of Array Antennas Under Interval Position Errors

C. Wang, S. Yuan, W. Gao, C. Jiang, C. Zhu, P. Li, Z. Wang, X. Peng, and Y. Shi

Wideband Circularly Polarized High-Order Bessel Beam Reflectarray Design Using Multiple-Ring-Cascade Elements

L. Yu, X. Li, Z. Qi, H. Zhu, Y. Huang, and Z. Akram

Low-Profile Broadband Antenna With Pattern Diversity

Y. Zheng, G. A. E. Vandenbosch, and S. Yan

Ultrawideband and Omnidirectional RCS Reduction by Using Symmetrical Coded Structures

A. Oruji, A. Pesarakloo, and M. Khalaj-Amirhosseini

Hepta-Band Metal-Frame Antenna for LTE/WWAN Full-Screen Smartphone

W. Fan, Y. Wen, L. Meng, P. Eggers, F. Zhang, I. A. Syrtytsin, J. Kristmundsson, S. Geng, and G. F. Pedersen

Low-Profile Broadband Patch-Driven Metasurface Antenna

W. Fan, M. Xue, L. Cao, T. Ye, and Q. Wang

A Hybrid Scheme for Accurate Electromagnetic Analysis With Open Conducting Structures

Y. He and M. S. Tong

Switchable Bidirectional/Unidirectional LWA Array Based on Half-Mode Substrate Integrated Waveguide

Q. Liao and L. Wang

Analysis of Spatial and Frequency Proximity on Performance of Small Loop and Dipole Antennas

S. Singh, F. Alsallum, S. M. Saeed, H. Bukhari, and D. Sievenpiper

Low-Cost Ultrawideband High-Gain Compact Resonant Cavity Antenna

T. Hayat, M. U. Afzal, F. Ahmed, S. Zhang, K. P. Esselle, and Y.vardaxoglou

AMC-Loaded Low-Profile Circularly Polarized Reconfigurable Antenna Array

J. Liu, J.-Y. Li, J.-J. Yang, Y.-X. Qi, and R. Xu
