Progress In Electromagnetics Research Letters
CONTENTS

Compact Microstrip Lowpass Filter with Ultra-Wide Stopband Characteristic Using Square Ring Loaded Resonators
Zhiqiang Li and Sung-Jin Ho ................................................................. 1

Eight-Element with H-Shaped Slot MIMO Antenna for 5G Applications
Zhong Yu, Yuqing Chen, Yongbin Xie, and Nan Guo ................................ 7

High Power Transmission Using Contactless Microwave Transition on an EMDrive Setup
Hugo Peyre, Olivier Pascal, Jérôme Sokoloff, Kevin Elis, Olivier Pigaglio, and Nathalie Raveu .... 15

A Novel Dual Band-Notched CPW-Fed UWB MIMO Antenna with Mutual Coupling Reduction Characteristics
Jingjing Zhang, Lingye Wang, and Wen Zhang ........................................ 21

A High Gain Dual Band Rectenna for RF Energy Harvesting Applications
Mohammed C. Derbal and Mourad Nedil .................................................. 29

Joint Beamforming and Power Splitting Design for Two Way AF Relay Networks with Energy Harvesting
Jun Shao and Jinxin Zhu ........................................................................ 37

A Compact Negative-Group-Delay Microstrip Bandpass Filter
Zhongbao Wang, Zheng Fu, Chengze Li, Shaojun Fang, and Hongmei Liu ................. 45

FDA Transmit Beamforming Synthesis Using Chebyshev Window Function Technique to Counteract Deceptive Electronic Countermeasures Signals
Shaddrack Y. Nusenu, Abdul Basit, and Emmanuel Asare ................................ 53

Towards Embedded RadCom-Sensors in Wind Turbine Blades: Preliminary Numerical and Experimental Studies
Jonas Simon, Jochen Moll, Viktor Krozer, Thomas Kurin, Fabian Lurz, Robert Weigel
Stefan Krause, Oliver Bagemiel, Andreas Nuber, and Vadim Issakov ...................... 61

Design of Triband Bandstop Filters Using a Stub-Loaded Stepped-Impedance Resonator
Shujun Yang, Zhigang Xiao, and Satilmis Budak ........................................... 69

Performance Analysis of Near-Field Magnetic Induction Communication in Extreme Environments
Hongzhi Guo ........................................................................................ 77

High Sensitivity Temperature Sensor Based on Photonic Crystal Resonant Cavity
Faiza Bounaas and Amel Labbani .............................................................. 85

Composite Dual Transmission Lines and Its Application to Miniaturization of Gysel Power Divider
Mukesh Kumar, Gobinda Sen, Sk. Nurul Islam, Susanta Kumar Parui, and Santanu Das ....... 91
Rain Attenuation for 5G Network in Tropical Region (Malaysia) for Terrestrial Link
Kesavan Ulaganathen, Tharek Bin Abdul Rahman, Md. Rafiqul Islam, and Khaizuran Abdullah

W-Band Subharmonic Mixer with Silica-Based Post-Wall Waveguide Interface
Tomas Thuroczy, Vitaliy Zhurbenko, Tom Keinicke Johansen, Yusuke Uemichi, Osamu Nukaga
Satoshi Okude and Ning Guan

Design of a Triple-Band Antenna Based on Its Current Distribution
Xubao Sun

Balanced Triple-Mode Microstrip Bandpass Filter Based on Double-Sided Parallel-Strip Line
Xiao-Bang Ji, Qing Liu, and Mi Yang

Design of Compact Electronically-Tuned Bandpass Filter with Sharp Rejection Skirt Using the Trans-Directional Coupled Line
Xiaojian Guo, Shao-Jun Fang, Hongmei Liu, and Zhongbao Wang

Ultra-Wideband Planar Dipole Array Antenna for Multifunction Phased Array Radars
Bin Li, Zhipeng Zhou, and Lei Sun

Compact Balanced Bandpass Filter with High Selectivity Based on Two Coupled Dual-Mode Microstrip Loop Resonators
Xiao-Bang Ji and Mi Yang
