Salivary parameters and periodontal inflammation in obstructive sleep apnoea patients
Mia Tranfić Duplančić¹, Renata Pecotić¹, Linda Lušić Kalcina¹, Ivana Pavlinac Dodig¹, Maja Valić¹, Marija Roguljić¹, Dunja Rogić², Ivana Lapić², Katarina Grdiša², Kristina Peroš³*, Zoran Dogaš¹

**Supplementary Table 2. Correlation of salivary parameters with AHI**

| Parameter        | Total N=142 |           |
|------------------|-------------|-----------|
|                  | r           | p         |
| Salivary flow    | 0.05        | 0.532     |
| Salivary pH      | 0.08        | 0.353     |
| Salivary calcium | 0.01        | 0.932     |
| Salivary phosphate | -0.07    | 0.417     |
| Salivary magnesium | 0.07     | 0.44      |
| Ca/Mg            | -0.07       | 0.412     |
| Ca/PO₄           | 0.02        | 0.782     |
| Mg/PO₄           | 0.11        | 0.212     |
| Salivary cortisol | -0.01     | 0.922     |
| Plaque           | 0.26        | 0.003     |
| BoP              | 0.06        | 0.487     |
| CAL              | 0.13        | 0.132     |

Abbreviations: Correlation coefficient (r); Probability value (p)
