Multi-trait genotype distance

B
Supplementary Figure S3 Ranking of genotypes based on MGIDI index and Strengths and weakness view of the stable genotypes identified in Control-0 mM (A) S1-150 mM (B) S2-250 mM. In this figure, the red circle indicates the cut point according to the selection pressure (SI = 10%). The MGIDI index identified 14 genotypes as more desirable accessions than others for each treatment.
