Supplementary Figure 1

(A) Scatter plot showing the correlation between age (years) and CP value. The line of best fit indicates a negative correlation (Spearman rho = -0.128, p-value = n.s.).

(B) Box plot comparing CP values between males and females. The groups are not statistically different (n.s.).

(C) Box plot comparing CP values between Rh(D) negative and Rh(D) positive groups. The groups are not statistically different (n.s.).

(D) Box plot comparing CP values between different blood types (A, AB, B, O). The groups are not statistically different (n.s.).
