Vaccinated vs. Unvaccinated Indiana COVID-19 Hospitalizations

Memorial Hospital is now offering some stats of their own. This was just released... 94% hospitalized COVID patients are unvaccinated!
Great Example in Plymouth, IN: St. Joseph Health System
Idea: 🧠
For EVERY Indiana hospital, have publicly available “red/blue people” graphic capturing stats on hospitalizations, ICU, ventilator use, and death by vaccinated vs unvaccinated status.
Polling Question: Do you think this idea would.... (mark all that apply):

1. Help hesitant patients get vaccinated?
2. Be useful for employers/all healthcare stakeholders to share on their social media to counter vaccine misinformation?
3. Be useful for employers/all healthcare stakeholders to share with employees to support rationale for mandates/incentives?
4. Be helpful to create an updated dashboard noting the state aggregate and each individual Indiana hospitals

IHIE Polling Question:

Will your organization require assistance obtaining COVID vaccination status on your employee population?
IHIE Polling Question:

Will the information need to be identifiable in order to be of value?
